#### DIRECTIONS FOR USE

**LAWN AND ORNAMENTAL TREES:** Spraying the area to be treated and covering the solution completely. Apply with such type sprayer, adjusting for narrow spray to prevent drift which could damage nearby desirable plants. For Spring and Fall applications, dilute 2 fluid ounces (6 tablespoons) Nutgrass Spray in 5 gallons of water and apply to an area of 1000 square feet. For mid-summer application, dilute 1 fluid ounce (2 tablespoons) in 5 gallons of water and apply to an area of 1000 square feet. Apply when weeds are young and actively growing. Good soil moisture gives best results. Water before application if soil is dry. Repeat applications at two week intervals result in better control than an immediate single dose. Root and leaves remain may be temporarily affected, especially in hot weather in dry soil. Do not apply to newly seeded lawns. Do not use on St. Augustine, cordgrass, dichondra or clover lawns.

Do not allow spray to drift into contact with trees, ornamental plants or vegetable gardens. Typical 2,4-D injury may result from misapplication.

**NON-CROP:** Nutgrass Spray is a contact herbicide useful for controlling annual broadleaf weeds and grasses, such as goosegrass, wild mustard, wild oats, chickweed, lambsquarters, common ragweed, pigweed, barnyardgrass, giant foxtail and yellow foxtail and to top-kill certain perennials such as Johnsongrass, Bahiagrass, nutgrass and toes. Nutgrass Spray is recommended for control of weeds along fences, sidewalks, driveways and pathways. It should be applied at the rate of 1 to 1 gallon per acre. (2 ounces in 3 to 5 gallons per 1000 sq. ft.) Spray unwanted vegetation thoroughly to just short of run-off. If regrowth occurs, reapply as required.

#### GENERAL INFORMATION

Patterson's Nutgrass Spray is useful for selective post-emergent control of common lawn weeds, such as Bahiagrass, dandelion, plantain and chickweed, without burning desirable lawn grasses. It is also useful for the control of a wide variety of weeds in non-crop areas, such as railroad right-of-way, roadside and storage areas. It is a combination of MSMA, 2,4-D and picloram. It is unnecessary to add any other surfactant to the spray solution. Best results are obtained on young actively growing weeds at air temperatures above 70°F.

## NUTGRASS SPRAY

### HERBICIDE

MSMA Plus 2,4-D (acid equivalent)

Shake Well Before Using

**ACTIVE INGREDIENTS:**  
 Dimethylammonium Acid Dimethanesulfonate 34.9%  
 Dimethylammonium Salt of 2,4-Dichlorophenoxyacetic Acid 9.3%  
**INERT INGREDIENTS:** 55.8%  
 Total Aromatic for chemical control in water soluble form 44.2%  
 Product contains 4.8 pounds MSMA and 1.9 pounds 2,4-D acid equivalent per gallon equal to 6.67%.

**CAUTION: Keep Out of Reach of Children.**

See Side Panel for Additional Caution Statements

**ACCEPTED**  
 with comment  
**DEC 15 1983**  
 Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 2169-251

#### MIXING INSTRUCTIONS

Nutgrass Spray must be thoroughly stirred. Stir well before starting to spray. Fill the spray equipment reservoir about half full with water and add the required amount of herbicide with agitation. Flush K'ing the reservoir with water and apply. After use, clean equipment thoroughly by washing with water containing an active detergent followed by a rinse with clean potable drinking water. Do not use equipment for other purposes until it has been thoroughly cleaned. Do not store spray solution in tank for a prolonged period.

#### CONTAINER DISPOSAL

Do not reuse empty container. Wash thoroughly with water and detergent, scrub if possible, and discard in a safe place.

**CAUTION:** Hazard if swallowed. Avoid contact with skin. Avoid breathing spray mist. Wash hands after using. Avoid storage near food or food products. Keep children and domestic animals off treated areas until this material has been washed into the soil. Do not store near fertilizer, seeds, insecticides or fungicides.

**ANTIDOTE:** If taken internally, induce vomiting and call physician at once. **READ ENTIRE LABEL BEFORE USING THIS PRODUCT.**

Do not allow spray to drift onto crop areas. Do not contaminate water used for domestic consumption, or by animals, wildlife and aquatic life, or for irrigation purposes. Do not allow livestock to graze treated areas. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

**NOTICE:** Buyer assumes all risk and liability of use, storage and/or handling of this material not in accordance with the terms of this label.

**BEST AVAILABLE COPY**

Do not contaminate water by cleaning of equipment or disposal of wastes. Do not feed treated foliage to livestock or graze treated areas. Do not spray or allow drift onto vegetables, ornamentals or other desirable plants. Do not apply when weather conditions favor drift from target areas. Do not apply directly to water.

#### STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store in original container in a cool dry place out of reach of children. Do not store near fertilizer, seeds, insecticides or fungicides.

Pesticide Disposal: Securely wrap original container in several layers of newspaper and discard in trash.

Container Disposal: Do not reuse this container. Rinse thoroughly before discarding in trash.

#### STATEMENTS OF PRACTICAL TREATMENT

If Swallowed: Call a physician or Poison Control Center immediately.

Induce vomiting by giving victim 1 or 2 glasses of water and touching back of throat with fingers. Do not induce vomiting or give anything by mouth to an unconscious person.

If In Eyes: Flush eyes with plenty of water. Call a physician immediately.

If On Skin: Remove contaminated clothing. Wash immediately with soap and water. Call a physician immediately.
