------------------------------	--

Pursell Snail & Slug Killer Pellets is a special preparation for the control of snails. It attracts and kills snails and slugs with Metaldehyde. The presence of snails and slugs can be detected by their shiny mucous-like trail. They are night feeders and prefer damp, cool places in the ornamental garden, flowers, under boards or flowerpots and around fences, hedges and bushes.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

Water area to be treated thoroughly. Broadcast Pursell Snail & Slug Killer Pellets late in the day in the areas likely to be infested. Apply to the soil and not directly on plants. Do not apply to edible parts or foliage. Scatter, do not leave in piles. In gardens and lawn areas, insure pellets are applied around base of bedding plants and other low growing plants where snails and slugs hide. To avoid early damage to your garden, apply before snails and slugs appear at spring planting.

Continuous watering and high temperatures cause this bait to gradually lose some of its effectiveness. Repeat applications every week to ten days during spring and summer months. Treatment every two weeks during fall and winter months is usually satisfactory. Repeated treatments provide control of new broods emerging during this period. Three applications ten days apart usually gives control of new hatch. Apply one pound of this product to each 2000 square feet of area.

To control snails and slugs on the following vegetable and fruit crops, apply to soil surface around plants and trees. Do not contaminate edible parts or foliage. One pound treats up to 2,000 sq. ft.

FRUIT CROPS:

Apples	Boysenberries	Loganberries	Plums
Apricots	Cherries	Nectarines	Raspberries
Avocados	Citrus	Peaches	Strawberries
Blackberries	Grapes	Pears	

VEGETABLES:
