HOW IT WORKS.

Vertagreen Boric Acid Insecticide Powder is a long-lasting, odorless powder effective in killing roaches and other-crawling insects. The powder provides longlasting protection from further infestations as long as it stays dry. Vertagreen Boric Acid Insecticide Powder sticks to the maches it comes in contact with. These roaches then spread the powder to other areas where roaches multiply and hide. The end result is all roaches (seen and unseen) are killed. Allow 14 days for the control of roaches.
