KN-48

DIRECTIONS

KN-48 is a powder which is added to the toilet water in the holding tank of a motorhome or trailer. It is used to deodorize the tank and to keep the water in the tank from becoming foul. It is also used to deodorize the tank when it is emptied.

Directions:

1. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer. This will deodorize the tank and keep the water from becoming foul.

2. Add 1/2 cup of KN-48 to the toilet water in the holding tank when it is emptied. This will deodorize the tank and keep the water from becoming foul.

3. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer when it is used. This will deodorize the tank and keep the water from becoming foul.

4. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer when it is used. This will deodorize the tank and keep the water from becoming foul.

5. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer when it is used. This will deodorize the tank and keep the water from becoming foul.

6. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer when it is used. This will deodorize the tank and keep the water from becoming foul.

7. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer when it is used. This will deodorize the tank and keep the water from becoming foul.

8. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer when it is used. This will deodorize the tank and keep the water from becoming foul.

9. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer when it is used. This will deodorize the tank and keep the water from becoming foul.

10. Add 1/2 cup of KN-48 to the toilet water in the holding tank of a motorhome or trailer when it is used. This will deodorize the tank and keep the water from becoming foul.
