Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 8709-7

Pond Care ®

HERBAL

APHID CONTROL

Pond Care HERBAL APHID CONTROL effectively protects ornamental aquatic plants against their most common pest, aphids. HERBAL APHID CONTROL contains herbal extracts which kill aphids on contact. HERBAL APHID CONTROL may be applied directly to the plant without removing it from the pond. HERBAL APHID CONTROL may be used in ponds containing fish. HERBAL APHID CONTROL leaves no oily residue on the pond water surface, and does not interfere with the biological filter.

READ ALL DIRECTIONS BEFORE USING.

HERBAL APHID CONTROL is a contact insecticide and has no residual or systemic activity. Begin treatment with this product as soon as aphid infestation appears. Aphids coming from nearby gardens and weeds can reinfest aquatic plants. Reapply HERBAL APHID CONTROL when aphids reappear. HERBAL APHID CONTROL can be applied as often as necessary.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. Shake well before using. When aphids first appear spray all exposed plant parts with HERBAL APHID CONTROL. All plant parts must be thoroughly sprayed.

IMPORTANT: Wait 5 minutes for aphids to die, then rinse off the plants with pond water or a fine mist from a garden hose. Aquatic plants must be rinsed off to remove dead insects and wash off the excess HERBAL APHID CONTROL. If allowed to dry, HERBAL APHID CONTROL can cause leaf curling on foliage plants like taro (*Colocasia esculenta*).

CAUTION: Do not use HERBAL APHID CONTROL on water lettuce (*Eichornia crassipes*). Do NOT use HERBAL APHID CONTROL when bees are in the area. Repeat application if insects reappear.

STORAGE AND DISPOSAL

Do not contaminate water or feed. Do not reuse container. Wrap container and put in trash.
