[Pond Care® HERBAL APHID CONTROL]

[Pond Care® Herbal Aphid Control effectively protects ornamental aquatic plants against their most common pest, aphids. / Herbal Aphid Control contains herbal extracts that kill aphids on contact. / Herbal Aphid Control may be applied directly to the plant without removing it from the pond. / Herbal Aphid Control may be used in ponds containing fish. / Herbal Aphid Control leaves no oily residue on the pond water surface and does not interfere with the biological filter.]

READ ALL DIRECTIONS BEFORE USING

Herbal Aphid Control is a contact insecticide and has no residual or systemic activity. Begin treatment with this product as soon as aphid infestation appears. Aphids, coming from nearby gardens and weeds, can reinfest aquatic plants. Reapply Herbal Aphid Control when aphids reappear. Apply Herbal Aphid Control as often as necessary.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. **SHAKE WELL** before using. For ornamental pond use only. When aphids first appear, spray all exposed plant parts with Herbal Aphid Control. All plant parts must be thoroughly sprayed. **IMPORTANT:** wait 5 minutes for aphids to die, then rinse off the plants with pond water or a fine mist from a garden hose. Aquatic plants must be rinsed off to remove dead insects and wash off the excess Herbal Aphid Control. If allowed to dry, Herbal Aphid Control can cause leaf curling on foliage plants like taro (*Colocasia esculenta*). Repeat application if aphids reappear.

PRECAUTIONS: Do not use Herbal Aphid Control on water lettuce (*Pistia stratiotes*). Do not use this product when bees are in the area. Avoid spraying in eyes.

STORAGE AND DISPOSAL: If empty, do not reuse this container. Place in trash or offer for recycling if available. If partly filled, call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
