

For: Cooling
Towers

For: Evaporative
Condensers

ALGAECIDE LIQUID CL-208

KILLS ALGAE AND FUNGI

CONTROLS ALGAE AND FUNGAL SLIME FORMATION

NONCORROSIVE TO METAL

For use in all open recirculating cooling systems such as cooling towers and evaporative condensers where water is not used for drinking or bathing purposes.

DIRECTIONS

If possible, manually clean systems thoroughly. Manually add 1 quart Precision Algaecide Liquid CL-208 directly to the cooling tower basin for each 1000 gallons of water in the system. Repeat this dosage every 2 to 4 weeks depending on algae growth.

ACTIVE INGREDIENTS	20.3%
Sodium Pentachlorophenate	11.85%
Sodium Salts of other Chlorophenols	1.65%
Sodium Trichlorophenate	6.8%
INERT INGREDIENTS	79.7%

WARNING:

KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed. Do not breathe spray mist. In case of swallowing, induce vomiting by administering warm salt water (one tablespoon per glass) or other emetic. Call a physician.

Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles when handling.

Solution will kill grasses and shrubs.

Do not contaminate potable or irrigation waters.

This product is toxic to fish and wildlife. Do not discharge treated effluent where it will drain into lakes, streams or ponds.

Rinse empty container thoroughly and discard it.
