

CLARECO

Net Wt. 3 lbs.

CLEARODINE

A QUALITY INDOOR POOL PURIFIER

ACCEPTED

APR 23 1968

UNDER THE FEDERAL INSECTICIDE
ACT, 1947 (7 U.S.C. 136) AND
FEDERAL FOOD, DRUG, AND COSMETIC
ACT, 1938 (21 U.S.C. 321)
EPA REG. NO. 6129-3
TO ATTACHED COMMENTS

**GENTLE • CLEAN • HEALTHY
SUPERIOR GERMICIDE • NON-BLEACHING
SINGLE DAILY APPLICATION**

ACTIVE INGREDIENTS:

1. 3-dichloro-5, 5-dimethylhydantoin	68%
Potassium Iodide	7%
Inert Ingredients	25%

U.S.D.A. Reg. No. 0000-0
Patent Nos. 3,161,588; 3,265,579 and 3,346,446

CAUTION: Keep out of reach of children. Harmful if swallowed. Avoid contact with skin or eyes, it may cause irritation — wash thoroughly after handling. Keep away from heat or combustible materials. Keep tightly closed when not in use.

CLEARODINE is preferred by bathers because it contains no active chlorine. Will not bleach hair, suntan, bathing suits or pool liners. Provides prolonged, superior germicide protection. The easily dispensed powder is stable in storage.

DIRECTIONS FOR USE

Special Treatment

When converting a chlorine pool to CLEARODINE, allow chlorine residual to drop below 0.2 ppm before starting treatment with CLARECO products.

Pretreat pool water that is cloudy, colored or has high mineral content (iron in excess of 0.1 ppm) with CLARECO CLARIFIER before sanitizing with CLEARODINE. If algae presents a problem in your area, use CLARECO ALGAECIDE to keep your pool sparkling and beautiful.

CLEARODINE Treatment

1. Backwash filter.
2. Adjust pH to 7.8 to 8.2.
3. Scatter across the pool surface 5 ozs.* of CLEARODINE per 5,000 gallons of water.
4. After one (1) hour, check for iodine residual of 0.6 ppm minimum using CLARECO Test Kit. PPM is the abbreviation for parts per million.
5. Maintain iodine residual at 0.6 to 1.0 ppm by scattering a minimum of 2 ozs.* of CLEARODINE across pool surface every day.
6. Use your CLARECO Test Kit frequently to guide you in maintaining an iodine residual of 0.6 to 1.0 ppm and a pH of 7.8 to 8.2.

*All ounce measurements are by volume. Use household measuring cup.

DEFINITIONS

1. Residual is the iodine remaining after reaction with bacteria or organic material contained in the swimming pool water.
2. pH is the term used to define whether the water is acid, neutral, or alkaline.

ANTIDOTES: External — Wash with water.

Eyes — Flush with large amounts of water.
Call a physician.

Internal — Drink milk, water, beaten egg white or vegetable oil; call a physician.
