6 MONTHS EFFICACY CLAIM)

# INSECTAPE<sup>®</sup>

INSECTICIDAL STRIPS

## KILLS ROACHES AND WATERBUGS CONTINUOUSLY UP TO 6 MONTHS

HERCON<sup>®</sup> "INSECTAPE" is a new insecticide product designed especially to control cockroaches and waterbugs continuously up to six months when placed where these insects crawl or hide. This unique strip is multi-layered in such a way that the insecticide on the surface of the strip is replenished continuously whenever it is disturbed by washing, wiping or even the activity of the insect pests. In this manner, "INSECTAPE" provides up to six months protection without the odor and mess of sprays or powders. Length of effectiveness may vary in different situations.

As noted in the enclosed booklet, the strips should generally be placed in dark out-of-sight locations. Use all 36 adhesive-backed strips to treat an average-size kitchen or two other rooms (there are usually more hiding places for roaches in the kitchen than in other rooms). Depending upon the degree of infestation, it will take from a few days to a few weeks before roach control is achieved.

**CAUTION:** Do not open protective pouch until ready to use. Harmful if chewed or swallowed. Avoid contact with eyes, clothing and food. Wash hands with soap and water after handling. Do not use in edible product areas of food processing plants, restaurants or other areas where food is commercially prepared, processed or served.

**NOTE TO PHYSICIAN:** Atropine is antidotal.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product  
in a manner inconsistent with its labeling.

Wipe or clean surfaces before applying. Do not place "INSECTAPE" strips in exposed locations where direct contact with children, pets, food or clothing is likely to occur. Recommended locations for positioning strips are outlined in the enclosed booklet. When treating a room, be sure to place strips in cracks, around pipes, in back of and under dishwashers, refrigerators, sinks and cabinets in the kitchen or bathroom or other dark areas where roaches hide. (If roach infestation is particularly severe you may wish to continue the application of conventional sprays or dusts.) Replace strips after six months or when effectiveness is diminished. FOR BEST RESULTS, read enclosed booklet for additional directions.

**WARRANTY:** Manufacturer warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to use of this product under abnormal conditions not reasonably foreseeable to manufacturer and user assumes the risk of any such use.
