

INSECTape[®]

ROACH KILLER WITH PROPOXUR

INSECTAPE is today's answer to more effective pest treatment. These new strips are 1 x 4 multi-layered strips that kill roaches and waterbugs. One strip application of INSECTAPE is needed to walk around the clock to bring roach infestations under control. Success may vary in different situations.

The patented HERCIN controlled release technology gradually releases the insecticide. Whenever the non-toxic insecticide on the surface is removed or disturbed by insect activity or by mopping and wiping, it is replenished continuously from a specially designed storage layer sealed in the strip. Depending upon the degree of infestation, it will take from a few days to a few weeks before roach activity is achieved. A package of 36 strips is enough to treat an average size kitchen. Two other rooms, kitchens usually contain no hiding places.

INSECTAPE AIDS IN THE CONTROL OF LIGHT HOUSEHOLD ROACH INFESTATIONS. IF INFESTATION PERSISTS, USE A SUPPLEMENTAL CONVENTIONAL TREATMENT. FOR HEAVIER INFESTATIONS, USE INSECTAPE ONLY AS A SUPPLEMENT TO CONVENTIONAL TREATMENTS (SPRAYS, DUSTS OR BAITS). GOOD SANITATION PRACTICES SHOULD BE FOLLOWED IN EITHER CASE.

PRECAUTIONARY STATEMENTS

Do not open protective pouch until ready to use. Strips should not be placed in exposed areas or in extremely hot locations. Avoid contact with eyes and clothing. Do not contaminate food, food containers or cooking utensils. Wash hands with soap and water after handling. Harmful if chewed or swallowed. See label for first aid instructions.

STORAGE AND DISPOSAL

Dispose of empty package and used strips in trash. Wrap used strips in newspaper.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Wipe or clean surface before applying. Remove paper backing and place strip as shown in enclosed booklet, except for application in areas where roach activity with children, pets, food or clothing is likely to occur. Apply strips in warm, dark, dark sight locations - in cracks, around pipes, in back of and under refrigerators and other appliances, under sinks and inside cabinets. Best results are achieved when INSECTAPE is placed in locations shown on the enclosed booklet application chart. Room being treated. An insecticide-free area of 2 ft. must be maintained at all times. Replace strips when a red streak is formed.

DO NOT USE IN FOOD AREAS OF FOOD PROCESSING PLANTS, RESTAURANTS OR OTHER AREAS WHERE FOOD IS COMMERCIAALLY PREPARED OR PROCESSED.

Use only in such non-food areas as garbage rooms, lavatories, boiler rooms, corridors and vestibules, offices, locker rooms, machine rooms, boiler rooms, corridors, restrooms and storage areas. Apply around water pipes, surfaces, but not in drains, sinks, showers, tables, pallets and similar areas. Do not use in areas where water is likely to be hidden or through which it may seep.
