

**Insectape**

Effective pest treatment. The secret to roach and waterbug control. Only one application of Insectape to bring roach infestation under control.

Advanced technology provides this long term activity on the surface. As roach or waterbug feeding, it is replenished continuously from the strip. Depending upon the degree of infestation, it may take a few weeks before roach kills are high enough to treat an average size kitchen or two roach hiding places.

**FOR LIGHT HOUSEHOLD ROACH INFESTATIONS - A SUPPLEMENTAL CONVENTIONAL PEST CONTROL STRATEGY. USE INSECTAPE ONLY AS A SUPPLEMENT TO OTHER PEST CONTROL METHODS (SPRAYS, DUSTS OR BAITS). GOOD RESULTS FOLLOWED IN EITHER CASE.**

**CAUTION STATEMENTS**  
Do not use. Strips should not be used in areas where children or pets are present. Avoid contact with eyes and clothing. Wash hands after use. Do not use in areas where food is prepared.

**DISPOSAL**  
Flush down toilet. Do not use in areas where food is prepared.

**PLACES FOR USE**  
Use in areas where roach and waterbug infestation is present. Apply strips to walls, baseboards, and under sinks. Do not use in areas where food is prepared.

**DO NOT USE IN PROCESSING PLANTS, RESTAURANTS, OR COMMERCIALLY PREPARED OR PROCESSED FOODS.**
