

LURETAPE
WITH JAPONILURE

JAPANESE BEETLE PHEROMONE DISPENSERS

HERCON LURETAPE WITH JAPONILURE is a bait that lures Japanese beetles away from valuable ornamentals, flowers and shrubs and into a Japanese beetle trap. LURETAPE is a laminated controlled release dispenser which contains sufficient Japonilure, the potent natural Japanese beetle sex attractant, to last one trapping season, generally from mid-June through August.

DIRECTIONS FOR USE
General Classification

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not open protective pouch until ready to use. Use one LURETAPE dispenser per trap. Peel off backing paper and apply LURETAPE to the top part, preferably on the baffle or vane, of the Japanese beetle trap. For improved beetle catches, LURETAPE is recommended for use with EPA-registered floral-lure (2-Phenylethyl) propionate and eugenol baits. Follow directions on Japanese beetle trap labels at all times.

DISPOSAL: Do not reuse empty container. Wrap container and put in trash collection.

MANUFACTURER'S WARRANTY

HERCULITE PRODUCTS, INC. warrants that the product, as of the time of its sale by HERCULITE, conforms to the statements on the label. Except as so warranted the product is sold AS IS. HERCULITE makes no other warranty express or implied of fitness or merchantability.
