HERCON®
DISRUPT III/PBW
WITH GOSSYPLURE

**MATING DISRUPTANT
 AND POPULATION SUPPRESSANT**

HERCON DISRUPT III/PBW is a mating disruptant and population suppressant for the pink bollworm moth. It is used to control the population of the pink bollworm moth in cotton fields. The active ingredient, gossyplure, is a sex attractant that disrupts the mating process of the pink bollworm moth. This results in a reduction in the number of offspring that are produced. The active ingredient, PBW, is a population suppressant that reduces the survival of the pink bollworm moth larvae. The combination of these two ingredients provides a dual mode of action for the control of the pink bollworm moth.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: Keep out of reach of children. For use only by trained personnel. Do not use in residential areas. Do not use in areas where people, livestock, or poultry are present. Do not use in areas where people, livestock, or poultry are present.

HAZARDS TO THE ENVIRONMENT: Keep out of reach of children. Do not use in areas where people, livestock, or poultry are present. Do not use in areas where people, livestock, or poultry are present.
