Angela M. Coco
Product Development Engineer.
Aberdeen Road Company d/b/a Hercon Environmental
Aberdeen Road, P.O. Box 435
Emigsville, PA 17318-0435

Subject: Non-PRIA (Pesticide Registration Improvement Act) Labeling and Formulation
Amendment – Change of Address, Addition of Alternate Names and Clarification of
Directions; and Substitution of Plastic Sources in Formulation
Product Name: HERCON® Disrupt® MCH HA
EPA Registration Number: 8730-83
Application Dates: 4/17/20
OPP Decision Numbers: 562487 and 562432

Dear Ms. Coco:

The amended labeling and Confidential Statement of Formula (CSF) referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, are acceptable.

This approval does not affect any terms or conditions that were previously imposed on this registration. You continue to be subject to existing terms or conditions on your registration and any deadlines connected with them.

Please note that the record for this product currently contains the following acceptable CSF:

- Basic CSF dated 4/17/20.

Any CSFs other than that listed above is superseded/no longer valid.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one (1) copy of the final printed labeling before you release this product for shipment with the new labeling. In accordance with 40 CFR § 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. “To distribute or sell” is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR § 152.3.

Page 2 of 2

EPA Reg. No. 8730-83

OPP Decision No. 562487 and 562432

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the U.S. Environmental Protection Agency (EPA). If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA-approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

Your release for shipment of this product constitutes acceptance of these terms. If these terms are not complied with, this registration will be subject to cancellation in accordance with FIFRA section 6.

If you have any questions, please contact Chris Pfeifer of my team by phone at (703) 308-0031 or via email at pfeifer.chris@epa.gov.

Sincerely,

MAIN LABEL

HERCON®
DISRUPT® MCH HA
BARK BEETLE ANTI-AGGREGANT

HERCON DISRUPT® MCH HA is a controlled-release pheromone formulation designed to lower the incidence of attacks by certain bark beetle species, including Douglas-fir beetle (*Dendroctonus pseudotsugae*), on tree stands.

ACTIVE INGREDIENT:

3-methyl-2-cyclohexene-1-one.....12.50%*

OTHER INGREDIENTS87.50%

TOTAL 100.00%

CONTENTS: 40 dispensers

One dispenser contains 400 mg of active ingredient

MINIMUM NET WEIGHT: 0.11 oz. (3.2 gms)/ dispenser, 4.5 oz. (128 gm/pouch) *

* One pouch contains 40 MCH dispensers to treat one acre.

Read Directions and Precautionary Statements
Before Use

FIRST AID:	
IF SWALLOWED:	
<ul style="list-style-type: none"> • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to by a poison control center or doctor. • Do not give anything to an unconscious person 	
IF IN EYES:	
<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. • Call a poison control center or doctor immediately for treatment advice 	
IF ON SKIN:	
<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor immediately for treatment advice. 	
IF INHALED:	

<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth if possible. • Call a poison control center or doctor immediately for further treatment advice.
Hotline Number
<p>Have the product container or label with you when calling a poison control center or doctor or going for treatment. For emergency information concerning this product, call the National Pesticide Information Center (NPIC) at 1-800-858-7378 seven days a week, 6:30 am to 4:30 pm Pacific Time (NPIC Web site: www.npic.orst.edu). After 4:30 pm call your poison control center at 1-800-222-1222.</p>

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic

Animals

CAUTION. Harmful if swallowed, absorbed through skin, or inhaled. Causes moderate eye and skin irritation. Avoid contact with skin, eyes and clothing. Avoid breathing vapor. Avoid contact with contents of dispenser. Do not manipulate dispenser, such as by cutting or tearing. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

Personal Protective Equipment (PPE):

Applicators and handlers must wear: long-sleeved shirt and long pants, socks, shoes, chemical resistant gloves, and protective eyewear. Follow the manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations:

Users should remove clothing/PPE immediately if pesticide gets inside, then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of

gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS: For terrestrial uses: Except under the forest canopy, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters or rinsate.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

DISRUPT® MCH HA is an effective management tool for certain bark beetles on various tree species. Methlycyclohexenone (MCH) is an anti-aggregation pheromone that when applied in the pouch form can protect susceptible host trees from infestation by Douglas-fir beetle (*Dendroctonus pseudotsugae*). Tree species include but are not limited to Douglas fir, Engelmann spruce, and other spruce tree species. Do not open pouches that contain the dispensers until ready to use. Do not use DISRUPT® MCH HA from damaged, punctured or unsealed containers.

APPLICATION:

Timing: Place dispensers in the field before beetle flight. Expected longevity of the dispensers is 50-60 days depending on weather conditions. Disrupt MCH HA is most effective when it is applied before beetles begin to fly and attack trees in the Spring. However, if it is applied early in the flight season, but after beetles have initiated attacks on a few trees, it may still reduce the number of trees that are killed within the treated area. Beetle flight in a

typical year occurs late April, early May. Disrupt MCH HA applied by the third week in April should be effective in protecting trees and will last throughout the beetle flight. A second treatment is recommended during an extended beetle flight.

Host Trees: Use on tree stands containing a significant number of both fallen and standing Douglas-fir trees and stumps.

Target Pests: The active ingredient in this controlled release product is an anti-aggregant pheromone for the Douglas-fir beetle (*Dendroctonus pseudotsugae*).

Application: Determine the size of the area to be treated and calculate the number of dispensers needed (See Application Rates below). Place the dispensers in the treatment area by stapling the dispenser on the north side of the tree or on snags, or hang dispenser from branches using a clip. Protect the dispenser from direct sunlight. Place the dispenser on the tree so that it lays flat against the trunk or object. A visual indicator such as a colored flagging strip or other marker may be used when deploying or removing dispensers to distinguish between new and old treatments. The indicator may be attached to or near the dispenser. Manipulating the dispenser such as by tearing or cutting may not be used as a visual indicator.

Application Rates

Individual Trees: For individual trees and areas 1 acre or less, place 2 dispensers on opposite sides of each tree. For trees larger than 24 inches dbh, place 4 dispensers per tree equidistantly around the bole at a height easy to reach (i.e. 6-8 feet).

Tree stands less than 2 acres: Place dispensers evenly around the perimeter of the treated area. Space the dispensers

approximately 15 feet apart. This will result in a dose close to the 30 dispensers/acre.

Tree stands more than 2 acres: Rate of application is 30-40 dispensers per acre. Place the dispensers in a grid pattern about 35-40 feet apart. Dispensers are usually placed on a tree, but if there are breaks in the tree stand, dispensers can be placed on fence posts, snags, shrubs or other objects such as stumps or logs as low as 1-2 feet above the ground to maintain proper spacing for the treatment area. Place at a height that applicators can easily reach (i.e. 6-8 feet)

For best results when using this product, remove and destroy all beetle-infested trees in treatment area before application.

In most cases 40 dispensers/acre (75/hectare) is sufficient, however if it is deemed necessary to increase the number of dispensers, 80 dispensers/acre (250/hectare) is the maximum rate of application per year. Retreat each year when Douglas-fir beetle infestations are likely.

Because there are many considerations when using this product (population densities, proximity, size and rate of growth of an infestation, stand age and compositions, elevation, climate, local weather) inexperienced users are advised to consult a professional forest entomologist or their State Forestry Agency for guidance. Monitor for infestations by visual inspection of the tree trunks.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE: Store in sealed containers in a cool dry place.

PESTICIDE DISPOSAL: Waste resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Plastic or paper foil bag: Non-refillable container. Do not refill or reuse this container. Completely empty bag. Then dispose of empty bag in a sanitary landfill or, if allowed by state and local authorities, by burning. If burned stay out of smoke. Do not reuse empty bag.

Expiration date

Not for sale or use after _____
(9 months after manufacturing date)

WARRANTY AND LIMITATION OF DAMAGES

Hercon Environmental warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in accordance with the Directions for Use under normal conditions of use to the extent consistent with applicable law. Hercon neither makes, nor authorizes any agent or representative to make any other warranty of fitness or of merchantability, guarantee or representation, expressed or implied concerning this material except as stated above. This warranty does not extend to the use of this product contrary to the label instructions, or under abnormal use conditions, or under conditions not reasonably foreseeable to Hercon Environmental to the extent consistent with applicable law. To the extent consistent with applicable law, Buyer's exclusive remedy for defective product shall be the replacement of the product, refund of the purchase price. To the extent consistent with applicable law, Hercon's maximum liability for breach of this warranty shall not exceed the purchase price of this product. In no case will Hercon be liable for incidental, consequential or special damages resulting from handling, storage, use, misuse or abuse of this product.

Optional Claims

- **Disrupt MCH Hand Applied (HA) [Alternate Name] will reduce the amount of Douglas fir beetle attacks on susceptible host trees.**
- **Disrupt MCH Hand Applied (HA) [Alternate Name] is a controlled released pheromone dispenser**
- **Protects your Douglas-Fir trees.**
- **Effective repellent for the control of Douglas-Fir Beetle.**
- **Anti-aggregation Pheromone.**
- **Releases pheromone during the entire beetle flight & is cost effective.**
- **Works by using the beetle's own pheromone against itself.**
- **Pheromone application can help to prevent the build-up of fatally damaging beetle population concentrations on high value trees and in important forested areas.**
- **Provide a controlled-release of the pheromone used by Douglas fir bark beetles to signal others of the species to avoid trees or forest areas already occupied by high beetle populations.**
- **These products function as an anti-aggregant signaling “No Vacancy” to invading bark beetles seeking suitable host trees to infest, thereby causing them to avoid the treated trees or tree stands.**
