TRIPLE ACTION CONTROL

of

Prevents the breeding of horn flies and face flies in the manure of treated cattle when used as directed.

Suppresses egg production and larvae development of stomach worms, nodular worms and hookworms.

Supports all balanced diet with a complete Trace Mineralized Salt.

BAR FLY

DO NOT OPEN BY CUTTING THE LOOP AND PULL END OF CHROME STRAP.

BAR FLY

ACCEPTED

APR 17 1973

UNDER THE FEDERAL INSECTICIDE FUNGICIDE AND ROBERTSON ACT FOR ECONOMIC POISON REGISTERED UNDER NO. 2227 SUBJECT TO ATTACHED COMMENTS.

FEEDING INSTRUCTIONS:

Diamond Crystal BAR-FLY Trace Mineralized Salt should be self-fed continuously as the sole source of salt, or mixed thoroughly in the feed at the rate of 1/8 ounce per head, per day, for each 100 pounds of body weight up to a maximum of 1 ounce for animals weighing 800 pounds or more. Protect from wind and rain.

CAUTION:

This product is not to be fed to lactating dairy cattle. Milk from dairy animals which have been treated with phenothiazine should not be used for food for four days following treatment. Individual animals are occasionally sensitive to phenothiazine.

Keep out of the reach of children.

NOTE:

For maximum protection against horn flies, we recommend spraying cattle when first starting on a continuous feeding program with this Diamond Crystal Trace Mineralized Salt Product (containing phenothiazine). This supplement prevents the breeding of horn flies and face flies in the manure, but does not affect the existing adult flies.

Be sure ample bunk space is available. Locate this Trace Mineralized Salt (medicated) near the animals' water or near their loafing area. Keep plenty available. If bunks or feeders are empty, do not expect to maintain control of fly breeding.

The usefulness of this product in preventing the breeding of horn flies and face flies is limited to a period of adult fly activity. However, its nutritional benefits and control of stomach worms, hookworms and nodular worm is continuous for cattle and sheep.

THIS SALT IS FOR ANIMAL FEEDING ONLY
E. P. A. REGISTRATION NUMBER 8747-1

SALT

SALT MEDICATED

Prevents the breeding of horn flies and face flies in the manure of treated cattle when used as directed. Aids in the prevention of stomach worms (Haemonchus, Osteragia, and Trichostrongylus spp.); nodular worms (Oesophagostomum spp.); and hookworms (Bunostomum spp.) in cattle and sheep.
