Tank and Spray Washers: Charge washer tank with diluted Freshgard 20, treat as indicated for specific product, and rinse with potable fresh water. Test treating solutions for concentration, pH, and temperature, immediately correcting any variances from the recommended values. Raise pH by careful addition of caustic soda solution. Heated Freshgard washes requires very close supervision. Observe the treating time limitations and avoid prolonged treatment during operational shut-downs. Treatment at low pH, or failure to rinse, may cause alkali injury. Do not use in undiluted form. Not suitable for foam washes.

The treating concentration, expressed as percent sodium o-phenylphenate tetrahydrate, is given in () following each dilution instruction.
