

ard 5

Directions for Use

Citrus Fruits, Apples, & Pears (Postharvest): Penicillium decay. Dilute one gallon of Freshgard 5 with 20 gallons soft water to make 1.86% sodium o-phenylphenate tetrahydrate foam washing solution. Apply to fruit with foam generator for cleaning and mold control. Rinse with potable water after 30 seconds treatment.

Packinghouse Premises Sanitation: Use 1 quart in 30 gal. water (0.3%) as a general sanitizing spray to reduce mold contamination on walls, floors, conveyors, and harvesting containers. Do not rinse.

Terms of sale or use: On purchase or use of this product buyer and user agree to the following conditions:

Warranty: FMC Corporation warrants that this product, as of the time of sale by FMC Corporation, (1) conforms to the ingredient statement on the label, and (2) is reasonably fit for the purpose set forth in the Directions for Use. Except as so warranted the product is sold as is. FMC Corporation makes no other warranty express or implied.

Damages: Buyer's or user's exclusive remedy for damages for breach of warranty or negligence shall be limited to direct damages not exceeding the purchase price paid and shall not include incidental or consequential damages. Notice of any claim must be reported to FMC Corporation within 10 days of discovery by buyer or user, failing which buyer or user waives any claim for such damage.

Excuse from non-controllable conditions: Because of certain critical conditions created or incurred by buyer or user over which FMC Corporation has no control, buyer or user, as a condition of purchase or use, assume responsibility for and release FMC Corporation from, liability arising out of the handling or use of the product attributable to such causes. No person is authorized to vary or waive any statement contained herein.

Freshgard 113

Directions For Use

Apples, Pears (Postharvest fruit rots): Botrytis, Gloeosporium, and Penicillium species. Thoroughly spray harvested fruit to be held in storage. While spraying, meter 1 volume Freshgard 113 uniformly into each 100 volumes of spray suspension for 300 ppm active ingredient.

Apricots, Cherries, Nectarines, Peaches, and Plums (Postharvest fruit rots): Spray harvested fruit as soon as possible after harvest. While spraying, meter 1 volume Freshgard 113 uniformly into each 100 volumes of spray suspension for 300 ppm active ingredient. Note: This treatment will not control species of Alternaria or Rhizopus.

Citrus Fruits (Postharvest): Blue mold, green mold and stem-end rots. Dilute 1 to 2 volumes Freshgard 113 to 50 volumes with water or wax emulsion for 600 to 1200 ppm active ingredient. Apply as dip, flood or spray. Use the higher level when the decay potential is high. If fruit is stored wet, adjust storage conditions to obtain fruit drying within 48 hours. For control of sporulation, dilute 2 volumes Freshgard 113 to 25 volumes with wax emulsion (2400 ppm) for spray application.
