PRECAUTIONARY STATEMENTS

WARNING

Hazard to Humans and Domestic Animals: When handling this product, wear chemical resistant gloves. Liquid contact may cause eye and skin irritation. Inhalation of vapor may cause respiratory irritation. Ingestion may cause nausea, vomiting, intestinal irritation, diarrhea, and dizziness. Continuous or prolonged inhalation of vapors may cause confusion, loss of muscle control, enlarged spleen, and liver damage.

Environmental Hazards: Drift or runoff may adversely affect nontarget plants. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

Most cases of groundwater contamination involving phenoxy herbicides such as 2,4-D have been associated with mixing/loading and disposal sites. Caution should be exercised when handling 2,4-D pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing or transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA

Physical and Chemical Hazards: Flammable Liquid. Exposure to heated surfaces, sparks, and flames can cause fire or explosion.

DIRECTIONS FOR USE

It is a violation of federal law to use this product inconsistent with its labeling.

STORAGE AND DISPOSAL

Storage: Flammable; keep away from heat, sparks, and open flames. Keep container tightly closed. Store away from oxidizing agents. Store in a cool, dry place with adequate explosion-proof ventilation. Vent containers, more frequently in warm weather, to relieve pressure. Electrically ground all equipment when handling this product and use non-sparking tools.

Pesticide Disposal: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law and may contaminate groundwater. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Citrus Fruits (Postharvest): Use Freshgard 24 as a plant regulator to promote healing of superficial wounds, to aid in control of fungal decay, and to delay peel necrosis. Add one volume Freshgard 24 to 39 volumes of potable water or wax emulsion for a 500 ppm, 2,4-D acid equivalent solution. Apply by dipping, drenching, or spraying.

For freshly harvested lemons, add one volume Freshgard 24 to 79 volumes potable water for 250 ppm, 2,4-D acid equivalent and apply by spray, flood, or drenching before curing. **Not for field use.**
