

For treatment of a freshly cleaned and filled pool, add initially 27 to 50 fl. oz. of E-Z CLOR ALGAE-KILL per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 9 to 12 fl. oz. of E-Z CLOR ALGAE-KILL per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of E-Z CLOR ALGAE-KILL throughout the water in the pool is necessary for maximum effectiveness.

E-Z CLOR ALGAE-KILL is compatible with those chemicals normally used to treat pools, and is effective at both acid and alkaline pH. E-Z CLOR ALGAE-KILL can be used in pools treated with chlorine chemicals, and may reduce the amount of those chemicals normally required. However, do not mix E-Z CLOR ALGAE-KILL with concentrated dry or liquid chlorine products.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

EPA Reg. No. 8791-8

ALGAE-KILL

COMPOSITION

Active ingredient:

Polyoxyethylene(dimethyliminio)ethylene
(dimethyliminio)ethylene dichloride 15.0%

Inert ingredient 85.0%

CAUTION
KEEP
OUT OF REACH
OF CHILDREN

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard container.
