

APPLICATIONS

E-Z CLOR ALGAECIDE is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using E-Z CLOR ALGAECIDE.

For pools having just visible algae growth add an initial dose of 24 to 37 fl. oz. of E-Z CLOR ALGAECIDE per 10,000 gal. of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 13 to 24 fl. oz. of E-Z CLOR ALGAECIDE per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 4 to 8 fl. oz. of E-Z CLOR ALGAECIDE per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of E-Z CLOR ALGAECIDE throughout the water in the pool is necessary for maximum effectiveness.

E-Z CLOR ALGAECIDE is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH.

ALGAECIDE

COMPOSITION

900540

NET CONTENTS
32 fl. oz.

E-Z CLOR ALGAECIDE can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix E-Z CLOR ALGAECIDE with concentrated dry or liquid chlorine products.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

POOL FORMULA

Rectangular or Square Pools: Length x width x average depth (in feet) x 7.5 (gives you pool capacity in gals.)

Round Pools: Diameter x diameter x average depth (in feet) x 5.9 (gives pool capacity in gals.)
