GENERAL INFORMATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

EZ Clor Granular Trichlor is for use against algae attached to pool bottom and/or horizontal surfaces. For floating algae or those adhered to side wall EZ Clor Liquid Algaecide or Algo-Klear should be used.

DIRECTIONS FOR USE

1. Using a suitable test kit, check total alkalinity and pH of pool water. Total alkalinity should be at least 80 ppm and pH 7.2-7.6. Add EZ Clor pH UP or pH DOWN as necessary to obtain correct reading.
2. Brush algae spots with a stiff bristle or wire algae brush.
3. Turn off pump and filter and allow water to settle. Filter should be off for 2-4 hours during treatment.
4. Broadcast Granular Trichlor over affected areas. The dosage is 1 to 1 1/2 ounces per 1000 gallons pool water.
5. After 2-4 hours brush the affected areas again and the algae should come loose. If any stubborn spots remain, repeat the treatment on those areas.
6. After treatment is complete and all granules are dissolved, check the pH and chlorine readings. Pool water should be maintained at pH 7.2-7.6 and chlorine at 10-20 ppm. Give shock dose at the above rates whenever algae first becomes visible.

Note: Since Granular Trichlor is a strong oxidizing and bleaching agent, DO NOT USE IN PAINTED OR VINYL LINER POOLS.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Add breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT—FIRST AID: If swallowed, feed bread soaked in milk, followed by olive oil or cooking oil. Call physician immediately if on the skin. Brush off excess chemical and flush skin with cold water for at least 15 minutes. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES Permit. For guidance, contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT: Strong Oxidizing Agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL

STORAGE: Keep container tightly closed. Store in a dry place. Do not allow water to get into container. Keep container off wet floors. Do not contaminate water, food, or feed by storage or disposal.

DISPOSAL: Wastes of this pesticide may cause irreversible eye damage and burns to skin and may be dangerous. Improper disposal of excess pesticide, spray mixture, or residue is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional office for guidance.

CONTAINER DISPOSAL: Completely empty container of contents including clinging granules. Rinse empty container with water and dispose of in a sanitary landfill or by incineration if owned by State and local authorities.
