

## E-Z CLOR® ALGAECIDE CONCENTRATE

Extra strength algaecide for controlling algae growth in swimming pools

## CAUTION KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food. Rinse empty container thoroughly with water and discard container.

See other precautions on back panel.
Active ingredient: Poly [oxyethylene (dimethyliminio)ethylene (dimethyliminio)ethylene dichloride] 60%
Inert ingredients: Tota' 100%

Net contents: 1 qt (.95 liters)

E-Z CLOR ALGAECIDE CONCENTRATE is used to control the growth of algae in swimming pols. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using E-Z CLOR ALGAECIDE CONCENTRATE.

For pools having just visible algae growth add an initial dose of 11 to 17 fl. oz. of E-Z CLOR ALGAECIDE CONCENTRATE per 10,000 gal. of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 6 to 12 fl. oz. of E-Z CLOR®ALGAECIDE CONCENTRATE per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 2 to 4 fl. pz. of E-Z CLOR\*ALGAECIDE CONCENTRATE per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of E-Z CLOR ALGAECIDE CONCENTRATE throughout the water in the pool is necessary for maximum effectiveness.

E-Z CLOR\*ALGAECIDE CONCENTRATE is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH.

E-Z CLOR® ALGAECIDE CONCENTRATE can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix E-Z CLOR® ALGAECIDE CONCENTRATE with concentrated dry or liquid chlorine products.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

## **POOL FORMULA**

Rectangular or Square Pools: Length x width x average depth (in feet) x 7.5 (gives you pool capacity in gallons).

Round Pools: Diameter x diameter x average depth (in feet)  $\times$  5.9 (gives pool capacity in gallons).
