10 APR 1986

TERM OF ISSUANCE

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Small Tabs (Private Label Product)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

E-Z Clor System
1651 Lotsie Blvd.
St. Louis, MO 63132

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This registration notice is being issued in accordance with Section 3(c)(7)(A) of the FIFRA subject to the following conditions.

(1) It is understood that you will submit and/or cite all data required for registration or re-registration of your product under Section 3(c)(5) of the FIFRA when the Agency requires all registrants of similar products to submit such data.

(2) You will submit five copies of your finished printed labels complying with the requirements or revisions specified in the attachment to this registration notice. These labels must be submitted to the Agency before the product is released for shipment as required by PR Notice 82-2, of June 18, 1982.

A stamped copy of the draft label is enclosed for your records. Your release of the product for shipment constitutes acceptance of these conditions. If the conditions are not complied with, the registration will be subject to cancellation in accordance with Section 6(e) of the FIFRA.

EPA Reg. No. 8791-

Small Tabs

For use in skimmers, floaters and feeders

KEEP OUT OF REACH OF CHILDREN

DANGER

See first aid and other precautions on back panel.

Active Ingredients

Trichloro-s-triazinetrione	98.6%
Inert Ingredients	1.4%
Available Chlorine	89%

NET WT.
2 LBS
(.91 Kg)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is effective as a pool water disinfecting agent when used as directed. It is recommended that the pool be stabilized with cyanuric acid stabilizer to nullify the dissipation effect of sunlight on chlorine. When using this product, both chlorine and cyanuric acid stabilizer are being added to the water, however, it is necessary to initially stabilize pools with cyanuric acid stabilizer to effectively maintain the desired concentration of stabilizer. Follow the directions on the label for that product.

APPLICATION PROCEDURE

The filter system should be backwashed or properly cleaned and the pH adjusted between 7.2 and 7.6. Before using this product, it is necessary that the pool be superchlorinated so that a free chlorine residual of between 1.0 and 3.0 ppm is obtained.

These tablets may be used in various type skimmers, floaters, proportioning mechanisms or feeders. Never add directly to pool. Adjust whatever feeding mechanism that might be used to assure consistent treatment level of 1.0 to 2.0 ppm free available chlorine in the pool water (normally 1-2 ozs. of this product per 10,000 gallons daily) (two tablets weigh approximately one ounce). The regular use of a free chlorine test kit will determine if further adjustment may be necessary to maintain the recommended level of free available chlorine in the pool water.

A shock treatment should be made every week during hot weather or after heavy rain. Less frequent shock treatments may be made during cool weather. For the shock treatment, add a fast dissolving chlorine according to the label directions for that product. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual is below 3.0 ppm.
