EZ CLOR

ECONOCIDE

swimming pool algacide

Concentrated Swimming Pool Algacide
Keeps Pool Water Clear and Free of Visible Algae
Controls Algae Growth in both Swimming Pools
and outside Spas/Hot Tubs/Baths

KEEP OUT OF REACH OF CHILDREN

ANGER

See side panel for
additional precautionary

state-ents.

NET CONTENTS
1 GALLON
(3.79 LITERS)

ACTIVE INGREDIENTS:	
diethyl (80% $\text{C}_{10}\text{H}_{22}\text{O}_2$, 30% $\text{C}_{10}\text{H}_{22}\text{O}_2$)	4.2%
dimethyl benzyl	
ammonium chloride	0.8%
n-Diethyl (80% $\text{C}_{10}\text{H}_{22}\text{O}_2$, 30% $\text{C}_{10}\text{H}_{22}\text{O}_2$)	95.0%
dimethyl benzyl	
ammonium chloride	
INERT INGREDIENTS	
TOTAL	100.0%

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

DANGER

Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

STATEMENT OF PRACTICAL TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of water. Avoid alcohol. Call a physician.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your state Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE IN SWIMMING POOLS:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Initial Dose: add 1 gallon ECONOCIDE swimming pool algacide to 25,000 gallons of pool water.

Maintenance Dose: add 1 quart ECONOCIDE swimming pool algacide to 25,000 gallons of pool water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or re-appear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently. If make-up water is added to the rate of more than 10% per week of pool capacity, add 1 quart of ECONOCIDE for each 5,000 gallons of fresh make-up water added per week.

When swimming season is over, add 1 gallon of ECONOCIDE to 25,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

When ECONOCIDE is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* (blue-green), *Lyngbya venetorum* (blue-green) and other swimming pool algae. ECONOCIDE is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other water-treating chemicals. ECONOCIDE works best when added by itself directly to pool water. ECONOCIDE in use dilution is non-corrosive to inanimate surfaces.

DIRECTIONS FOR USE IN SPAS:

Initial Dose: Add 2 quarts ECONOCIDE to 2,500 gallons of spa water.

Maintenance Dose: per 5,000 gallons of spa water, add 1 quart ECONOCIDE at 3-5 day intervals. If high temperatures prevail or spa has unusually heavy use, add maintenance dose more frequently. If make-up water is added to the rate of more than 10% per week of spa capacity, add 1 quart of ECONOCIDE for each 5,000 gallons of fresh make-up water added per week.

When swimming season is over, add 1 gallon of ECONOCIDE to 25,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

When ECONOCIDE is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* (blue-green), *Lyngbya venetorum* (blue-green) and other swimming pool algae. ECONOCIDE is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other water-treating chemicals. ECONOCIDE works best when added by itself directly to pool water. ECONOCIDE in use dilution is non-corrosive to inanimate surfaces.
