Petroleum Distillate	9.16%
<b>INERT INGREDIENT</b>	<b>80.00%</b>

\*equivalent to 1.6% butoxypropylene glycol and .4% of related compounds.

Contents: Net weight 12 ounce EPA Reg. No. 6799-b

**KILLS AND REPELLS**

This unit is specifically designed to provide home owners with an effective method of killing and repelling flies and mosquitoes.

Industrial units for restaurants, hospitals and food handling establishments are presently in use. But the battery operated C-H Home Spray unit is the first electronically operated automatic insecticide dispensing device which utilizes portability and flexibility designed to expand the technique for effective home use.

**INSTRUCTIONS**

The C-H Home Spray is inserted, as directed, into the automatic dispenser and when operating emits 100 mg. of insecticide into the air automatically every 15 minutes. 15-minute operation is recommended to kill flies and mos-

quitoes in enclosed areas and the machine operating continuously will kill flies and mosquitoes in a 6,000 cu. ft. enclosed area. Usually the effect level of C-H Home Spray will be noticeable within one hour after the machine is activated and if less than 24-hour service is required the machine should be set to start one hour before hours and run one hour after service is desired. The 12 ounce can contains approximately 3,300 mg. When set on the 15 minute firing cycle there is enough material to last approximately 30 days when used on a 24-hour basis.

C-H Home Spray automatic aerosol insecticide is a highly effective concentrated aerosol insecticide containing Pyrethrins and Piperonyl Butoxide.

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

Do not store above 120 F. Do not use or store near heat or open flame. Do not puncture or incinerate container. Cover or remove fish bowls from treated area. Do not use in nurseries or rooms where infants, ill or aged persons are confined. Contents under pressure.
