A Non-selective Weedkiller

Comment

CAUTION: Keep Out of the Reach of Children

Do not use on crops, lawns, or ornamental plants. Do not use on areas where children may play. Do not use on areas where livestock may graze. Avoid contact with skin and clothing. May cause irritation of eyes, nose, throat, and skin. May cause breathing difficulties. Do not use in or near turf, golf courses, or other desirable plants. Special care should be taken against application to areas where children may play. Do not contaminate water used for drinking or bathing. Wash thoroughly after use.

ACTIVE INGREDIENTS:	By Wt.
Bromacil (5-bromo-3 sec-butyl-6-methyluracil)*...	4.0%
Sodium metaborate (Na ₂ B ₄ O ₇ · 5 H ₂ O)**	51.0%
INERT INGREDIENTS:	
Attaclay	45.0%
TOTAL ---	100.0%

*Equivalent to 5.0% Hyvar-X, a product of E. I. DuPont De Nemours & Co.

**Equivalent to 4.98% as elemental boron.

HABCO is the exclusive trade mark property of Horne-Boatright Chemical Co.

USDA Reg. No. 2342-X

HABCO 5HB is a granular non-selective weedkiller designed to be applied dry to the surface of the ground for control of weeds. The kill of weeds may be slow as the chemical is absorbed through roots of weeds and must be carried to root zone by moisture. It is low in toxicity to man and animals when applied according to directions. The degree of control and duration of effect will vary with the amount of chemical applied, soil type, rainfall, and other conditions.

DIRECTIONS

Before applying, measure area to be treated and select rate per acre desired to get amount needed for treatment. Calibrate over a small area and get even coverage with the rate/acre selected. A Seeder or Granular Herbicide Applicator may be used. 2 1/3 cups of HABCO 5HB per 100 sq. ft. is approximately 400 lbs. broadcast per acre rate.

GENERAL WEED CONTROL

To control most weeds for an extended period of time on non-crop land such as Utility, Highway, Pipeline and Railroad Right of Way, Petroleum Tank Farms, Lumberyards, Storage Areas, Industrial Plant Sites, and around Farm Buildings, apply 60 to 120 lbs. per acre to control ANNUAL WEEDS and GRASSES such as foxtail, crabgrass, ragweed, and lambs'-quarters.

Apply 140 to 240 lbs. per acre to control PERENNIAL WEEDS and GRASSES such as Bahia grass, dogfennel, goldenrod, plantain, and wild carrot.

Apply 300 to 600 lbs. per acre to control HARD-TO-KILL PERENNIAL GRASSES such as JOHNSON-GRASS, BERMUDAGRASS, DALLISGRASS, NUT-GRASS, and VASEYGRASS.

Use the higher levels of the dosage rates on adsorptive soils (usually those high in organic matter or carbon). Make application of HABCO 5HB just before or during the period of active growth of weeds.

NOTE

For best results, vegetation should be cleared before treatment. This reduces fire hazard of dead weeds and aids in getting more even coverage of the area.

CONDITIONS OF SALE

Neither the manufacturer nor the seller makes, and neither authorizes any person to make, any guarantee, representation or warranty, express or implied, concerning this material, except that it substantially conforms to the chemical description on the label, and any damages resulting from nonconformance thereto shall be limited to direct damages and shall not include consequential damages.
