HABCO* HYCHLOR MR

A GRANULAR GRASS AND WEED KILLER

PRODUCT NO. 20-739051

GENERAL INFORMATION

HABCO HYCHLOR MR is a non-selective herbicide designed for use where control of all vegetation is desired. It is specific for extended weed control in non-crop areas such as tailroad rights of way and yards, highways, around utility poles. along fence lines or pipelines, storage yards, industrial sites and wherever vegetation might create a fire, drainage or appearance problem.

DIRECTIONS FOR USE

FOR ANNUAL GRASSES AND WEEDS — Apply 200 to 400 pounds per acre (1/2 to 1 pound per 100 square feet).

FOR PERENNIAL GRASSES AND WEEDS — Apply 400 to 800 pounds per acre (1 to 2 pounds per 100 square feet). After the initial application, touch-up applications may be reduced to 200 pounds per acre. Hard-to-kill vegetation such as Johnsongrass, Bermudagrass and Vaseygrass may require 800 pounds per acre (2 pounds per 100 square feet).

APPLICATION

Broadcast with a conventional hand or power spreader that can accurately apply uniform coverage over the areas to be treated. Power equipment using the airblast system is also available. The treatment may be applied at any time of the year but moisture is needed to carry the chemical into the root zone of the soil. Best time of treatment is before vegetation has emerged or when weeds are small.
