HABCO BUTYL 4

• ¿ 4D ENTIRE LABEL BEFORE USING THIS PRODUCT **GENERAL INFORMATION**

HABCO BUTYL 4 is a selective herbicide recommended for the control of many broadleaved weeds in crops, along fence rows, around farm buildings and similar areas. The following is a partial list of the weeds controlled by HABCO BUTYL 4.

Bindweed Carpetvieed Cocklebur Dandelion Dock Goldenrod Knotweed

NET CONTENTS

GALLONS

Kochia Lambsquarters Ragweed Mustards Morningglory

Pigweed

Plantain Shepherdspurse Thistles Nettle, stinging Wild carrot Wild radish

NOTE: Local conditions, crop varieties and application regulations vary and may affect use of this herbicide. Consult local agricultural experiment station or extension service weed specialists and state regulatory agencies for recommendations in your area.

TREATING SMALL AREAS: One tablespoon of HABCO BUTYL 4 in 11/2 gallons of water is about equal to 1 quart

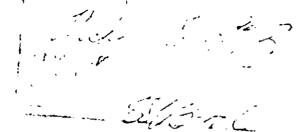

When stored at temperatures below freezin,, it may be necessary to warm the contents to 45 degrees F, and mix thoroughly before using.

DIRECTIONS FOR USE

PREPARATION OF THE SPRAY: Fill the spray tank with half the required amount of water; then add the recommended amount of HABCO BUTYL 4 and continue filling spray tank with balance of water. Keep agitator running when filling spray tank and during spray operations. The amount of water required for low-volume applications may vary from 5 to 25 gallons per acre. For high-volume applications, 100 gallons or more of water will be needed for good coverage. In any case, use the same amount of 2,4-D recommended per acre.

TIME OF APPLICATION: Best results are obtained when HABCO BUTYL 4 is used on young weeds that are actively growing. Applications of lower rates to susceptible annual weeds usually will be satisfactory, but for perennial weeds and other conditions, such as in very dry areas where kill is difficult, use higher rates. When used as a selective spray on crops, the stage of growth of the crop must be considered. Some woody plants and weeds are hard to kill and repeat applications may be necessary.

SMALL GRAINS (Wheat, Barley, Rye): Apply HABCO BUTYL 4 in sufficient water for uniform coverage on small grains when fully tillered or stooled (4 to 8 inches tall), but before head emerges from the "boot". Crop injury may result if applied earlier than "tiller" or later than "boot" stage. DO NOT use on grain undersown with legumes, such as alfalfa or clovers, except where some legume injury can be tolerated. DO NOT graze or feed forage from treated fields within 2 weeks after treatment. See chart for recommended

CAUTION

KEEP OUT OF REACH OF CHILDREN

See Other Cautions On This Label

HABCO BUTYL 4

Contains 4.0 Pounds of 2,4-D Acid Equivalent Per Gallon **ACTIVE INGREDIENT:** Butyl Ester of 2,4-Dichlorophenoxyacetic Acid* 56.5% **INERT INGREDIENTS: 43.5%** TOTAL 100.60%

*Equivalent to 2,4-Dichlorophenoxyacetic Acid 45.0%

EPA Reg. No. 8823-46

For late season use to control large succulent weeds, apply 1 to 2 pints per acre in sufficient water for uniform coverage on small grain from dough stage to harvest use only when weeds threaten to interfere with arvest operations. DO NOT use treated straw for livestock feed.

CORN: PREEMERGENCE Use HABOO BUTYL 4 in sufficient water for uniform coverage. Best results are obtained when applied 3 to 5 days after planting, but before corn emerges. DO NOT apply to light, sandy soils. POSTEMER-GENCE - Apply HABCO BUTYL 4 from emergence to tasseling. When spraying corn taller than 10 inches, use nozzle extensions ("corn drops"), directing the spray at base of the corn plant. DO NOT apply from tasseling to dough stage, Avoid cultivation soon after treatment when corn may be brittle. Hybrids vary in tolerance to 2,4-D. Consult local agricultural experiment station or extension service weed specialists regarding the use of 2,4-D on your specific hybrid. See chart for recommended rates.

SORGHUM: Apply HABCO BUTYL 4 when sorghum plants are 6 to 12 inches tall and secondary roots are well established. Uta drop nozzles when crop is over 10 inches tall. DO NOT apply from flowering to dough stage. See chart for recommended rates.

Amount of HABCO BUTYL 4 per Acre

Crop (See Detailed Directions Above)	For Average Conditions	For Dry Conditions as in Western States *
Wheat, Barley, Rye		
Annual Weeds	½ to 1 pint	1 to 2 pints
Perennial Weeds	1 pint	1:: to 2 pints
Corn		
Preemergance	1 to 2 quarts	
Postemergence	·. pint	3. to → pint
Sorghum	•	
Postemergence	· ¿ pint	√2 to % pint

*Arizona, California, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming

PASTURES: To control many broadleaved weeds in pastures meadows and rangelands, use 2 pints per acre of HABCO BUTYL 4 in sufficient water to provide for uniform application. Treat pasture when weeds are growing actively. DO NOT apply to newly-seeded pastures until grass is well established or after heading begins. DO NOT spoty when grass is in "boot" to "milk" stage. Most legumes are usually enjured or killed at the rates recommended. For control of wild gains and wild onion in pastures, apply 2 to 3 quarts per acre in very early spring and repeat annually until weeds are eradicated. Injury may result if applied to bentgrass or St. Augustinegrass. DO NOT graze dairy animals on treated areas within 7 days after treatment.

WCODY FLANT CONTRC To control 2 4-D sus eptime woody plants such as alder, buckbrysh, elderberry, sunge and willow on non-crop, land and waste areas, use ? to 3 quarts in 100 gailons of water. Wet thoroughly all parts of the plants, including foliage and stems, to the point of runoff. Higher volumes are necessary where the brush is very dense and over 6 to 8 feet high. Application; are more effective when applied to actively-growing plants. DO NGT treat during periods of severe drought or in early fall when leaves have lost their healthy green color. Hard-to-kill species may need retreatment the following season.

GENERAL WEED CONTROL: Along fence rows, drainage ditch banks, around farm buildings and similar areas, use 1 to 2 quarts of HABCO BUTYL 4 in 100 gallons of water per acre. It proughly wet all foliage to run-off.

CAUTION

Harmful if swallowed,

May cause skin irritation.

Avoid contact with eyes, skin and clothing. If contact with eyes occurs, flush with plenty of water.

DO NOT store near fertilizers, seeds, insecticides or fungicides. DO NOT contaminate irrigation ditches or water used for domestic purposes.

Use care to avoid spray drift to 2,4-D susceptible plants such as cotton, tomatoes, flowers, grapes, fruit trees and ornamentals. Trace amounts of spray drift may cause severe injury to both growing and dormant plants. Coarse prays are less likely to drift. Spray only on calm days using low pressure and lowered booms. VAPORS from this product may insure 2,4-D sensitive plants in the vicinity.

Flush sprayer out on suitable non-crop area after use. DO NOT use the same spray equipment for applying other materials to plants as injury will result.

DO NOT reuse empty container. Return to drum reconditioner, or destroy by perforating, crushing and burying or discarding in a safe place,

This product is toxic to fish. Keep out of lakes, streams or ponds. DO NOT contaminate water by cleaning of equipment or disposal of wastes. Apply only as direct don this
