ACCEPTED

HABCO MSMA 6

5-18-73

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR CONTROL OF WEEDS RECORDED
ED UNDER NO. 8823-52

A second or repeat application, if needed, should be timed about 1 to 3 weeks after the first application. Keep spray off cotton foliage.

APPLY ONLY WHEN COTTON IS 3 INCHES HIGH TO FIRST BLOOM. DO NOT APPLY AFTER FIRST BLOOM.

Slight burning and reddish discoloration of cotton foliage may occasionally be seen following recommended treatment; however, cotton plants will develop normally and yield will not be affected.

EMERGENCY PREPLANT APPLICATION: When planting of cotton to prepared seedbeds has been delayed and weeds have emerged, one application of HABCO MSMA 6 at the above rate can be made prior to seeding.

NOTE: Applications to cotton in Florida should be confined to band treatments.

ORNAMENTAL TURFGRASS: HABCO MSMA 6 can be used for selective control of bahiagrass, barnyardgrass, chickweed, smooth and large crabgrass, dallisgrass, nut sedge, sandbur and wood sorrel with little or no injury to well-established, actively-growing turfgrasses. Mow turfgrass to height of 1 to 1½ inches before treatment. Mix 1 fluid ounce (2 tablespoons) of HABCO MSMA 6 in 5 gallons of water for application to an area of 1,000 square feet. Application should be uniform and thorough to adequately wet all undesirable plants. Two or more repeat treatments at 14-day intervals may be necessary. Make applications during warm weather when temperature is between 80 and 90 degrees F. DO NOT water turf for at least 24 hours after application. Turfgrasses may be temporarily discolored. Bermudagrass, bluegrasses and zoysiagrass have shown tolerance to properly-applied HABCO MSMA 6. Injury may result if applied to bentgrasses and fescues. DO NOT apply to St. Augustinegrass, carpetgrass, centipedegrass or to Dichondra. DO NOT reseed until 2 weeks after last application.

NON-BEARING FRUIT AND NUTS: HABCO MSMA 6 is effective as a directed post-emergence spray for control of the above listed weeds in non-bearing almond, walnut, grapefruit, lemon, lime, orange, and tangerine orchards and plantings of non-bearing apples, cherries, peaches, pears, plums and prunes. Mix at rate of 2-2/3 pints HABCO MSMA 6 in 100 gallons of water and apply to an area of one acre. For spot treatment of weeds, mix 2-2/3 pints of HABCO MSMA 6 in 50 gallons of water and apply to point of run-off. Application should be made when weeds are small, during warm weather and when conditions are favorable for good weed growth. If regrowth occurs repeat applications should be made, but not more than three applications per year. DO NOT allow spray solution to contact foliage, stems or bark of trees or vines. DO NOT use around trees or vines from which crops will be harvested within one year. DO NOT graze treated areas. In Florida, use only as a spot treatment.

NON-CROP: HABCO MSMA 6 is effective in controlling the above listed weeds and many similar weeds on drainage ditchbanks, fence rows, rights-of-way, storage yards & similar non-crop areas. Application should be made when weeds are small and conditions are favorable for good weed growth. Mix at a rate of 2½ to 2-2/3 pints of HABCO MSMA 6 in 40 gallons of water. Spray undesirable vegetation thoroughly to point of run-off. Adequate coverage and complete wetting of foliage is important for effective control. Repeat applications may be necessary if regrowth occurs.

CAUTION

Harmful if swallowed.

Avoid contact with skin and eyes. In case of contact, flush eyes with plenty of water.

Avoid breathing spray mist.

Wash hands after using.

Keep away from children and domestic animals and do not allow them on treated areas until material has been washed into soil.

DO NOT store near food and feed products.

DO NOT feed treated forage to livestock or graze treated areas.

DO NOT spray or allow drift onto vegetables, ornamentals or other desirable plants.

DO NOT contaminate waters used for domestic purposes or by animals, including wildlife and aquatic life, or water used for irrigation purposes.

DO NOT reuse empty container. Return to drum reconditioner, or destroy by perforating, crushing and burying or discarding in a safe place.

WARRANTY AND LIMITATION DAMAGES

SELLER warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and BUYER assumes the risk of any use contrary to such directions. SELLER makes no other express or implied warranty, including any other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of SELLER is authorized to do so except in writing with a specific reference to this warranty. In no event shall SELLER's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.
