PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

Fumakilla, Ltd.
c/o Robbin Todd
Insect Control & Research, Inc.
1330 Dillon Heights Avenue
Baltimore, MD 21228

Dear Dr. Todd:

Subject: Fumakilla Mosquito Coils
EPA Reg. No. 8842-8
Submission dated 1/17/06

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. One copy of the finished labeling must be submitted prior to releasing the product for shipment.

Under the Precautionary Statements revise the "cover exposed food" to read:
Do not contaminate food.

Revise the statement "For best results use in confined area..." to delete the reference to confined area. This detracts from the directions to use outdoors.

Revise the direction for use #9 "For best results do not use in wind" to read Do not use when wind speed exceeds 10 mph.

If you have questions, please call Ann Sibold at 703 305-6502.

Sincerely,

Richard Gebken
Product Manager 10
Insecticide Branch
Registration Division (7505C)

*Under the Federal Insecticide,
 Fungicide, and Rodenticide Act,
 as amended, for the pesticide
 registered under EPA Reg. No.*

8842-8

**FUMAKILLA MOSQUITO COILS REPEL MOSQUITOES
 OUTDOORS**

- For best results use in confined area with little or no breeze.
- Place one coil every 10 feet.
- Use on patio, at camp sites and cabanas outdoors.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Stand serves as a holder for the coil; place the center piece in upright position.
2. Loosen outer rings of coils until ends move freely.
3. Grasp each comma-shaped portion in the center between thumb and forefinger of each hand.
4. Separate the comma-shaped portions by gently pressing them in opposite directions 1/4 inch apart.
5. Hold one comma-shaped end and shake lightly or gently pry apart to separate coils.
6. Insert tip of coil stand into slot in comma-shaped end of coil.
7. Light outer end of coil until glowing
8. Place coils 6-10 feet apart around area to be protected.
9. For best results do not use in wind.
10. If shorter periods of use are desired, break coil into appropriate length and place in notched cut-out of holder.
