Rid-a-Bug®

Concentrate Brand DD7-2 Home Insect Killer

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING

Pressure Sprayer: This is a concentrated insecticide. To mix, add the contents of this bottle (16 fl. oz./32 fl. oz.) to one/two gallon(s) of water.

KILLS PESTS INDOORS WHERE YOU KNOW THEY LIVE: Roaches, Ants, Crickets, Silverfish, Spiders, Centipedes, Earwigs, Waterbugs, Carpet Beetles: Spray heavily into cracks, crevices, openings around pipes using a pressurized sprayer. Spray until wet behind and beneath cabinets and appliances, under rugs, around carpet edges, baseboards, doors, window frames, and other points of entry, storage areas and any localized area infested with these pests. For best results use at least monthly - more often if re-infestations occur.

KILLS PESTS OUTDOORS: Flies, Mosquitoes, Moths, Wasps and Hornets, Ants, Crickets, Earwigs, Centipedes, other Insects Outdoors: Spray outside surfaces or screens, doors, window frames or wherever insects may enter with either the Ready-to-Use Sprayer Cap or a Pressurized Sprayer. Also treat surfaces around light fixtures on porches, in garages and other places where insects are seen. For treatment of localized infestations where there are weeds or brushy non-crop areas, spray thoroughly. Repeat every two weeks or as often as needed.

Hose-End Sprayer for Outdoor Use: Set your hose-end sprayer/applicator to apply 6 1/3 fl. oz. of concentrate, which will cover up to 1,000 sq. ft. (2 teaspoons = 1/3 fl. oz. or 6 teaspoons = 1 fl.oz.) Note: Spoons or measuring cups must not be used for food purposes after use in measuring pesticides.

Ready-to-Use Sprayer Cap for Outdoor Use

1. Screw hose into back of sprayer cap.
2. Remove cap from bottle (save cap for storage after use). Insert sprayer unit into bottle and secure tightly by turning bottle counterclockwise.
3. Turn on water supply. To START FLOW OF INSECTICIDE, place index finger over hole on right side of yellow sprayer cap.
4. Spray evenly and completely over lawns and other infested areas, giving special attention to areas frequented by pets. Hold about 3 feet above surface, moving at a steady pace to insure consistent, thorough coverage.
5. When treatment is complete, or you wish TO STOP FLOW OF INSECTICIDE for any reason, simply remove finger from hole to break siphon action.
6. TO STORE REMAINING INSECTICIDE: Turn off water supply and remove bottle from sprayer unit and hose by turning bottle clockwise. Replace cap on bottle and tighten securely. Unscrew hose from sprayer unit and rinse unit in clear water. Place insecticide plus sprayer assembly back into carton and store in cool place. Note: For best results, area to be

- Contains DURSBAN • Kills on Contact • Kills Fast
- Residual action — Keeps killing for 4 weeks • Professional Strength Formula • Keeps killing pests for weeks • Kills hidden bugs • Economical do-it-yourself control • Economical concentrate • Water-based formula • Kills adult fleas and their hatching eggs (larvae) • Non-staining • No unpleasant odor • Treats 3,600/7,200 square foot home (pint/quart) • Use Indoors and outdoors

- Ready-to-use hose end spray cap attached for outdoor use • No waste siphon feed — control with one finger • Mixes automatically — No measuring — no mess • No mixing — Easy to use — Concentrated • Kills fleas and their larvae • Won't burn lawns • Will not damage lawns • Covers 3,500/7,000 square feet of yard (pint/quart) • Kills fire ants • Kills the mound • Kills the stinging/imported fire ant • Kills 8/16 mounds per pint/quart • Make 8/16 gallons per pint/quart (For Fire Ant Control)

Active Ingredient:

Chlorpyrifos [O,O-Diethyl O-(3,5,6-Trichloro-2-pyridinyl) phosphorothioate] 6.0%
 Inert Ingredients 94.0%

Keep Out of Reach of Children

CAUTION

See Back Panel for Additional Precautionary Statements

Net Contents 16 fl. oz. (1 pint) or 32 fl. oz. (1 quart)

treated should be dry. During very hot weather, morning or late afternoon application is recommended. Repeat treatment as necessary. Not recommended for use on azalea, camellia, poinsettia, variegated ivy or rosebushes.

For Treatment of Fire Ant Mounds

1. Apply as a drench diluted at the rate of 2 fl. oz. per gallon of water.
2. Gently sprinkle a total of 1 gallon of the diluted solution over the surface of each mound using a sprinkling can. Thoroughly wet mound and surrounding area to a 4-foot diameter (12 square feet). For best results, apply in cool weather, 65-85°F, or in early morning and late evening hours. Treat new mounds as they appear. Do not use a pressurized spray, since this may disturb the ants and cause migration, reducing product effectiveness.

Storage and Disposal

Storage: Store in a cool place away from heat, direct sunlight or open flame. **Disposal:** Securely wrap original container in several layers of newspaper and discard in trash.

PRECAUTIONARY STATEMENT

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed or absorbed through skin. Avoid breathing vapor and spray mist. Avoid contact with skin, eyes or clothing. Avoid contamination of feed and foodstuffs. Remove pets, birds and cover fish aquariums before spraying. Do not allow children or pets in treated area until surfaces dry. Wash hands thoroughly after spraying.

Statement of Practical Treatment

If Swallowed: Call a physician or Poison Control Center immediately. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Never induce vomiting or give anything by mouth to an unconscious person. **If on Skin:** Wash contaminated clothing and affected areas with plenty of soap and water. **If in Eyes:** Flush eyes with plenty of water. Call a physician if irritation persists. **If Inhaled:** Remove victim to fresh air. Apply artificial respiration if indicated. **Note to Physician:** This product may cause cholinesterase inhibition. Atropine is antidotal. 2-PAM may be effective as an adjunct to atropine.

Environmental Hazards

This pesticide is highly toxic to fish, birds and other wildlife. Do not apply directly to water. Drift and runoff from treated sites may be hazardous to fish in adjacent waters. Do not contaminate water when disposing of equipment washwaters.
