JUL 16 1990

Ms. R. Claire Bousquet THE SPECIRUM GROUP Division of United Industries P.O. Box 15842 St. Louis, MO 63114

Subject: Amendment - Revise per Diazinon Registration Standard and the Agency's May 1, 1990 Data Call-In letter to reflect only those uses supported by Ciba-Geigy Spectracide Crawling Insect Control Granules EPA Reg. No. 8845-94 Your submission dated June 4, 1390

Dear Ms. Bousouet:

43

4

. .

The amendment referred to above, submitted in connection with a registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided the following revision is made prior to release for shipment under the amended labeling:

- On page 2 of the label, in the bold print section under the heading "In Gardens", delete the pests "Armyworms", "Carrot rust flies", "Corn borers", "Rootworms" and "Vinegar flies" since these pests are associated with use patterns not supported by Cita-Geigy and which will not appear on the revised label.
- 2) In the directions for "Overall Lawn Application", directly after the italicized "Precautions", replace the paragraph "Apply Spectracide Crawling Insect Control Granules at the rate of 2 lbs. per 1000 sp. ft. (an area 20' by 50') or 3.2 og. per 100 sp. ft. (an area 10' by 10')." with the two paragraphs that appear on your latest label for the product Spectracide 6000 Lawn & Garden Insect Control, EPA Peg. No. 8845-95 (but modified to show the name of this product):

Apply Spectracide Crawling Insect Control Granules with a fertilizer spreader. See spreader setting chart below. Apply when grass is dry. Repeat as necessary.

For application with other types of equipment, apply at the rate of 2 lbs. per 1000 sq. ft. (an area 20' by 50') or 3.2 oz. per 100 sq. ft. (an area 10' by 10').

[Be sure to add the associated "Lawn Spreader Setting No." chart.]

- 3) In the heading for the directions for use on melons, relocate the closing parenthesis mark to appear after "... and hybrids of these" rather than after "... and hybrids of these and watermelons".
- 4) In the directions for use on sweet corn, delete the directions for post-emergence application because, based on the results of avian field studies, Ciba-Geigy has decided not to support such uses. Specifically, delete directions for use against "European Corn Borers". "Fall Armyworms", and "Southwestern Corn Borers". Also, delete the associated "Notes" concerning picking corn immediately after last application and not feeding fodder to livestock for 10 days following application, since these remarks are no longer appropriate to the remaining pre-plant application directions.

A stamped copy of the label is enclosed for your records. Please submit five (5) copies of the revised amended label prior to release for shipment under the amended label. Please refer to the Diazinon Registration Standard, as amended, for release for shipment and channels of trade dates for diazinon products bearing appropriately amended labels.

Sincerely yours,

George T. LaRocca Product Manager (15) Insecticide-Rodenticide Branch Registration Division (H7505C)

#### Product Label

#### Precautionary Statements Hazards to Humans and Domestic Animals CAUTION

Harmful if swallowed, inhaled, or absorbed through skin. Avoid breathing dust and contact with eyes, skin or clothing. Wash thoroughly after handling and before eating or smoking. May cause contact sensitization following repeated contact with skin of susceptible individuals. Avoid repeated contact with skin. If sensitization reactions result, consult a physician. Do not store near food or feed products. Food utensils such as spoons or measuring cups must not be used for food purposes after use in measuring pesticides. Do not contaminate ornamental fish ponds. Do not allow children or pets on treated areas until granules have been watered into the soil and the grass or soil is dry.

#### STATEMENT OF PRACTICAL TREATMENT

If swallowed: call a physician immediately. Drink one or two glasses of water and induce vomiting by touching the back of the throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth if person is unconscious or convulsing. If Inhaled: remove victim to fresh air and apply artificial respiration, if indicated. If on skin: wash promptly with soap and water. Rinse thoroughly. If In eyes: rinse eyes with plenty of water and call a physician immediately. Note to Physician: This product is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but onty in conjunction with atropine.

#### **ENVIRONMENTAL HAZARDS**

This product is highly toxic to birds, fish, and other wildlife. Birds, especially waterfowl feeding or drinking on treated areas may be killed. Because of the migratory habits of certain Atlantic Coast waterfowl, do not apply this product to lawns in Nassau County, New York, between November 1 and May 20. Do not exceed maximum primited label rates. Amplication rates above those recommended significantly increase potential hazards to birds and waterfowl. Avoid overlapping granules. Where irrigation (watering) is recommended in the directions or it viaterfowl, i.e., oucks or geese, can be ACCEPTED with COMMENTS in EPA Letter Dated:

JUL +6 1990

Directions for Use and Conditions of Sale and Warranty IMPORTANT: Read the entire Directions for Use and the Notice of Seller warranty before using this product.

Notice: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

#### **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

#### **OVERALL LAWN APPLICATION**

Spectracide Crawling Insect Control Granules controls the following lawn insects on both grass and dichondra lawns: Ants • Armyworms • Bermudagrass mites • Brown dog ticks • Chiggers • Chinch bugs • Clover mites • Crickets • Cutworms • Earwigs • Fleas • Lawn moths (sod webworms) • Leafhoppers • Millipedes • Sowbugs • Springtalis (Collembola)

PRECAUTIONS: Birds, especially waterlowl, feeding or drinking on treated area: may be killed. Apply this product only as specified on this label. Because of the migratory habits of certain waterlow-1 do not apply in Nassau County, Nuw York between November 1 and May 20. Do not elected mutinuum permitted label rates, since rates above those recommended significantly increase potential hazards to birds. Avoid overlapping treated areas. If waterlowl, i.e., ducks, geese, can be expected to enter the treated area after treatment (except spot treatments), water lawn with at least 1/4 inch water immediately after application, however, stop watering before puddling occurs.

Apply Spectracide Crawling Insect Control Granules at the rate of 2 lbs. per 1000 sq. ft. (an area 20' by 50') or 3.2 oz. per 100 sq. ft. (an area 1J' by 10').

Billbugs; White grubs of Japanese beetle, European chafer, Southern chafer, Ateenius spretulus (dung beetle): Apply 2 lbs. per 1000 sq. ft. of lawn. Water grass thoroughly after application. For billbug control, apply when activity is first observed or when chewed or brown grass indicates damage from these insects. Repeat as necessary. For grub control, except dung highlight the any time between late July and early October. I or dung beetle grub control, apply in Spring or early Summer when damage is first noticed. Water grass thoroughly with 1/4 -1/2 in. of water after application. Treat again in late Summer or early Fall if a second generation occurs. Hyperodes weevils: Apply 2 lbs. per 1000 sq. ft. of grass. Water grass thoroughly after application. Treat problem areas in mid-April and again in mid-May.

#### SPOT TREATMENT LAWNS

Ants: Apply 1 1/2 teaspoons of Spectracide Crawling Insect Control Granules over and around each ant hill. Fire ants: To aid in the control of fire ants in lawns and other recreational areas, apply 1/2 cup over, and 2 ft. around, each fire ant mound. Immediately after application, water in thoroughly. Apply gently to avoid disturbing ants. Use of high pressure watering equipment may disturb the ants and cause migration, reducing product effectiveness. A minimum of 1 gallon of water should be applied to each mound area. Reapply as necessary. Notes: For best results, apply in cool weather, 65–80°F, or in early morning or late evening hours. Works within 24 hours. No waiting for days or weeks. Treat new mounds as they appear.

Digger wasps: Apply 1 1/2 teaspoons of Spectracide Crawling Insect Control Granules in and around each nest opening. Apply at dusk when wasps are not active.

BAND TREATMENT AROUND HOUSE FOUNDATION The following pests are commonly found around or near foundations of houses as well as in lawns. Certain of these

page 2 of 6

pests may enter houses.

Ante	Earwigs	Sowbuge
Brown dog tick	Fleas	(Plibugs)
Clover mites	Millipedes	Springtails
Crickets		(Collembola)

Apply a 5 foot band of Spectracide Crawling Insect Control Granules next to the house foundation. Distribute granules uniformly, using a rate of 3.2 oz. for each 100 sq. ft. of area (5' by 20') treated. Repeat as necessary.

#### **VEGETABLES - INSECT CONTROL**

1

Spectracide Crawling Insect Control Granules controls certain garden insects on crops listed in the following tables. Apply uniformity as directed for each crop. When a range of rates is given, use the higher rate only for heavier infestations.

Unless directions under "Timing/Special Directions" state otherwise, applications for control of pests listed below should be thoroughly mixed into the soil during or immediately after application.

insect	Depth of Mixing or Incorporation Into Soli
Surface cutworthis	2-3 inches
Sublemanean dutworms	3-6 inches
Mole crickets	1-2 inches
Root maggots	3-4 inches
Wireworme	4-8 inches

\*If type of cutworm cannot be identified, mix into soil 4-8 inches deep.
