U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (7505C)
401 "M" St. S.W.
Washington, D.C. 20460

EPA Reg. Number:
8845-127

Date of Issuance:
OCT 16 1998

Term of Issuance:
Conditional

Name of Pesticide Product:
HOT SHOT SUDDEN DEATH
BRAND MOUSE & RAT KILLER

NOTICE OF PESTICIDE:

- Registration
- Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Spectrum Group
Division of United Industries Corp.
P.O. Box 15842
8825 Page Boulevard
St. Louis, MO 63114
Attn: William H. Metzger

S 549943
10/17

Note: Changes in labeling offering in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and on file all data required for registration/ reregistration of your product under FIFRA sec. 3(d)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4. **Please note that the Reregistration Eligibility Decision (RED) for Bromethalin was issued in July 1998. This product is subject to the requirements of the Bromethalin RED and product-specific Data Call-In (DCI), and you must submit acceptable responses within the timeframe(s) provided in the RED. If you did not receive a copy of the RED, please contact Dennis Deziel (SRRD Reregistration Branch I) at (703) 308-8173.**
2. Modify the proposed labeling for the outer container and the individual 0.75 oz. place packs submitted on September 28, 1998 as follows before you release the product for shipment:
 - A. Revise the EPA Registration Number to read, "EPA Reg. No. 8845-127."
 - B. In the **Application Directions for House Mice**, there is a typographical error: change the ~~plur~~ placepacks to the singular form, placepack.
 - C. In the **Application Directions for Norway and Roof Rats**, in the first sentence change "2 or 8" to "2 to 8".

continued on p. 2

Signature of Approving Official

Reg. Permit

Date:

OCT 16 1998

D. In the **Storage and Disposal** section, add a "." after the last sentence.

- 3. Submit two copies of your revised final printed labeling before you release the product for shipment.

Please note that this product may only be packaged and sold as indicated on the stamped accepted labeling (i.e., 0.75 oz. placepacks in packages of 24). Any change in the package size would be considered a label amendment and you would be required to submit an application for amended registration for this product. In addition, any proposed package size with a net content of less than 6 oz. (i.e., less than eight 0.75 placepacks) must bear qualifying statements which indicate that only a limited number of rats could be expected to be controlled with the amount of bait in the package.

If the above specified conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

Stamped copies of the labeling for the carton and the individual placepacks are enclosed for your records. If you have any questions regarding this notice, please call me at (703) 305-5417 or (703) 305-5404.

Sincerely yours,

Peg Perreault
 Chemical Manager, Team 4
 Insecticide-Rodenticide Branch

SUDDEN DEATH™ Brand Mouse & Rat Killer

[Mouse & Rat Poison Packet • Contains Blitrex®
Kills mice & rats • Mouse and rat control for in and around the
home • For indoor and outdoor mouse & rat control • Satisfaction
guaranteed or your money back!]

Active Ingredient 0.01%
Bromethalin
Other Ingredients 99.99%

KEEP OUT OF REACH OF CHILDREN
CAUTION SEE OTHER CAUTIONS ON BACK

Contains 24 - 0.75 oz. Packets
TOTAL NET WT. 18 OZ.

[House mice and rats may consume a lethal dose in a single feeding, with the first dead mice or rats appearing one or two days after they eat the bait. Mice or rats may cease feeding after consuming a lethal dose in a single-night's feeding, but most will die two or more days later. Sudden Death™ is effective against anticoagulant-resistant mice and rats.]

DO NOT OPEN PLACEPACKS. MICE & RATS WILL CHEW THROUGH THE WRAPPER.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: DO NOT EXPOSE CHILDREN, PETS, OR OTHER NONTARGET ANIMALS TO RODENTICIDES. TO HELP TO PREVENT ACCIDENTS:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

Use Restrictions: For control of mice, Norway rats and roof rats in and around homes, industrial and agricultural buildings, and similar man-made structures. May also be used in alleys located in urban areas, inside transport vehicles (ships, trains, aircraft), and in and around related port or terminal buildings. Do not use this product in sewers. Do not place baits in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

Selection of Treatment Areas: Determine areas where mice and rats will most likely find and consume the bait. Generally, these areas are along the walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where mice or rats or their signs have been observed. Remove as much food accessible to mice and rats as possible.

Application Directions: Sudden Death™ does not contain an anticoagulant rodenticide. Generally, mice and rats will consume a lethal dose in a single feeding with death occurring one or more days later.

HOUSE MICE: Apply one placepacks per location. Two unopened placepacks may be needed at points of extremely high mouse activity. Space placements 8 to 12 feet apart in areas where mice are active.

NORWAY & ROOF RATS: Apply 2 or 8 unopened placepacks per location. Adjust the number of placepacks used according to the level of rat feeding expected at each location. Space placements 15 to 30 feet apart in areas where rats are active.

Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment. After several days, inspect the placements and replenish bait at sites where there is evidence of heavy feeding. Although one night's feeding will usually provide a lethal dose, maintain bait for at least a week to provide all of the mice or rats a chance to feed on the bait. Baiting should be continued until all signs of feeding have ceased. Where a continuous source of infestation is present, establish permanent bait stations and replenish bait as needed. Collect and properly dispose of all dead mice or rats and leftover bait.
