RE: Notification to add a 20-count size to the labeling
EPA Reg No.: 8845-127
Date of Submission: April 26, 2007

Dear Ms. Morton:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated April 26, 2007, for the product, Hot Shot Sudden Death Brand Rat & Mouse Killer 1. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the actions requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at 703-305-6249 or Joyce Edwards of my staff at 703-308-5479.

Sincerely,

Theresa A. Stowe

Attention: Mr. Daniel Peacock

Subject: Notification per PR Notice 98-10
Hot Shot Sudden Death Brand Rat & Mouse Killer I
EPA Reg. No. 8845-127

Dear Mr. Peacock:

Please find enclosed notification per PR Notice 98-10 to add a 20-count size to the labeling. In your email to Bill Metzger, dated 2/27/07, you indicated that this change would not require a change in use directions and therefore would be appropriate to submit to the Agency via notification. A copy of this email is enclosed for your reference.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

The following documents are enclosed in support of this submission:

1. Application for Pesticide (EPA Form 8570-1)
2. One copy of your email to Bill Metzger regarding this issue
3. One copy of the proposed label *with changes highlighted*
4. Five copies of the proposed label
5. One copy of the EPA stamped approved label

Please call me at 1-800-242-1166, Ext. 2737 you have questions or need further information. Thank you very much for your attention to our application.

Sincerely,

Jennifer D. Morton
Regulatory Specialist

Subject: Re: Rodenticide Net Weights, Bromethalin Product, 8845-127

Bill,

For rodenticides, we need to know any changes in net weight. Many times changes in directions are needed, especially for anticoagulants in packages sizes less than 1 lb. However, in this specific case, the simple addition of the 20 count size would NOT change the use directions. Therefore, simply send a notification and reference this E-Mail.

Thank You,

Daniel B. Peacock, Biologist

Subject
Rodenticide Net Weights

02/27/2007 10:15 AM

Dan,

We currently hold a registration (8845-127) for a Rat and Mouse product.

This uses 0.75 ounce packets and the Net Wt. statement indicates , "Contains 8, 10, 12 or 24 packets". If we want to have a 20 packet package, can we just make that change as we are allowed on other pesticide products?

PR Notice 98-10 is not clear. It seems to indicate that changes in Net Wt on a rodenticide is not notifiable. Can you clarify?

Thanks.

Total Net Wt 6 oz; 7.5 oz; 9 oz; 15 oz; 18 oz

PRODUCT CARTON

[Norway rats, Roof rats and House mice usually consume a lethal dose in a single night's feeding, but it may take two or more days from the time of bait consumption for these rodents to die. Rodents cease feeding after consuming a toxic dose. This product kills anticoagulant resistant rats and mice.]

DO NOT OPEN PLACE PACKS, MICE & RATS WILL CHEW THROUGH THE WRAPPER.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STOP READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: DO NOT EXPOSE CHILDREN, PETS, OR OTHER NON-TARGET ANIMALS TO RODENTICIDES. TO HELP TO PREVENT ACCIDENTS:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled, and unconsumed bait as specified on this label.

Use Restrictions: For control of mice, Norway rats and roof rats in and around homes, industrial and agricultural buildings, and similar man-made structures. This product may also be used in alleys located in urban areas, inside transport vehicles (ships, trains, aircraft), and in and around related port or terminal buildings. Do not use this product in sewers. Do not place baits in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

Selection of Treatment Areas: Determine areas where mice and rats will most likely find and consume the bait. Generally, these areas are along the walls, by

2/0

gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where mice or rats or their signs have been observed. Remove as much food accessible to mice and rats as possible.

Application Directions: Sudden Death™ does not contain an anticoagulant rodenticide. Generally, mice and rats will consume a lethal dose in a single feeding with death occurring one or more days later.

HOUSE MICE: Apply one placepack per location. Two unopened placepacks may be needed at points of extremely high mouse activity. Space placements 8 to 12 feet apart in areas where mice are active.

NORWAY & ROOF RATS: Apply 2 to 8 unopened placepacks per location. Adjust the number of placepacks used according to the level of rat feeding expected at each location. Space placements 15 to 30 feet apart in areas where rats are active.

Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment. After several days, inspect the placements and replenish bait at sites where there is heavy feeding or where there is evidence of heavy feeding. Although one night's feeding will usually provide a lethal dose, maintain bait for at least a week to provide all of the mice or rats a chance to feed on the bait. Baiting should continue until all signs of feeding have ceased. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed. Collect and properly dispose of all dead mice or rats and leftover bait.

STORAGE AND DISPOSAL

Storage: Store only in original container in a cool, dry place inaccessible to children and pets. **Disposal. If empty:** Do not reuse this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS

Hazard to Humans & Domestic Animals

CAUTION. May be harmful if swallowed. Keep away from humans, domestic animals and pets. Wash thoroughly with soap and water after handling this bait.

FIRST AID

Have label with you with seeking treatment advice.

If swallowed	<ul style="list-style-type: none"> • Call a Poison Control Center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a Poison Control Center or doctor.
If on skin or clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a Poison Control Center or doctor for treatment advice.

NOTE TO PHYSICIAN

This product is not an anticoagulant type of rodenticide. If ingested, limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

Environmental Hazards

This product is toxic to mammals and birds. Do not apply this product directly to water. Dogs and other predatory and scavenging mammals might be poisoned if they feed upon animals that have eaten this bait.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
