**READY TO USE  
 NEW DISCOVERY**

**SAFEGUARD  
 BRAND**

**DIRECTIONS FOR RATS:** Place 4 ounces to 1 pound of Safeguard Brand Mice and Rat Killer in locations frequented by rats. Replace bait as consumed so that feeding is not interrupted for more than 1 day or two at the most. Use no decomposed, mouldy or sour bait. Where a continuous source of infestation prevails from nearby dumps or fields, permanent bait stations should be used and Safeguard Brand Mice and Rat Killer replenished as needed. Baiting should continue until complete lack of feeding is noted. This should be from Ten to Fourteen Days. Be sure that sufficient Safeguard Brand Mice and Rat Killer is at hand to complete a continuous 14 day feeding program. If bait is exhausted before rats have been completely eliminated obtain additional Safeguard Brand Mice and Rat Killer promptly. Continuous uninterrupted feeding is what gives you control.

**DIRECTIONS FOR MICE:** For controlling mice, follow the same general directions as for rats except bait placements of tablespoon amounts (1/4 to 1/2 oz.) of bait should be placed at 8-12 foot intervals. An uninterrupted supply of bait should be maintained for at least 5 days.

**CAUTION:** Safeguard Brand Mice and Rat Killer should not be placed where children or animals may eat it. If this possibility exists, place bait where it cannot be reached. In case of eating, give 1 quart of water and repeat at 15 minute intervals. Consult a physician for treatment.

**NOTE FOR PHYSICIANS:** When a human has been known to have ingested Safeguard Brand Mice and Rat Killer, blood transfusions combined with intravenous injections and oral doses of Vitamin K are indicated in the case of hemorrhage caused by overdoses of Dicumarol.

USDA Reg. No. 8848-2

MANUFACTURED BY  
**SAFEGUARD CHEMICAL CORPORATION**  
 NEW YORK, N. Y.

ACTIVE INGREDIENTS:  
 WARFARIN-3-(alpha-acetonylbenzyl)-4-hydroxycoumarin . . . . . 0.025%
