PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION

Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing vapor or spray mist. Do not smoke while applying this product. Wash thoroughly with soap and water after handling and before eating or smoking. May cause contact sensitization following repeated contact with skin. If sensitization reactions result, consult a physician. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS

Keep out of lakes, streams, ponds, tidal marshes and estuaries. Do not apply directly to water or to areas where surface water is present. Do not contaminate water by disposal.

PHYSICAL OR CHEMICAL HAZARDS

CAUTION: FLAMMABLE. Contents under pressure. Keep away from heat, sparks and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. DO NOT USE NEAR FIRE OR OPEN FLAME.

STATEMENT OF PRACTICAL TREATMENT

If swallowed - Call a physician or Poison Control Center immediately. Gastric lavage is indicated if material was taken internally. DO NOT INDUCE VOMITING. Vomiting may cause aspiration pneumonia.
If inhaled - Remove victim to fresh air. Apply artificial respiration if indicated.
If on skin - Remove contaminated clothing and wash affected areas with soap and water.
If in eyes - Flush eyes with plenty of water. Get medical attention if irritation persists.
NOTE TO PHYSICIAN: This product contains an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered but only in conjunction with atropine. This product contains petroleum distillate solvent which may present an aspiration hazard. Gastric lavage may be indicated if product was taken internally.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For spot application only. Do not use as a space spray.

Remove protective cap. Hold dispenser upright, point valve opening away from face, and about 8-10 inches from surface being treated. Aim nozzle, press plastic button to release spray. Apply spray covering 1 to 2 linear feet per second to infested cracks, crevices, baseboards and areas where the insects rest and hide. Moisten surface thoroughly, avoid running or streaking. Spray leaves an invisible film, that kills many insects crawling over it.

NOTE

Do not use this product indoors as an overall surface spray or as a space spray. Take care not to introduce this product into the air during application. Use only in well ventilated areas. Do not apply where children are likely to frequently contact treated surfaces. Do not treat pets or plants with this product. Remove pets and cover fish bowls before spraying. Do not apply when other persons are in the immediate area. Do not allow children or pets in treated areas until spray has dried. Do not use in commercial food processing, preparation, serving or storage areas. In the home all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Cover or remove exposed food.

TO KILL ROACHES, WATERBUGS, SPIDERS, CRICKETS, SILVERFISH and certain other crawling insects - spray infested areas around refrigerators, under sinks, behind shelving, book cases and other hiding places; particularly infested cracks, crevices and baseboards. Repeat as necessary. Do not spray inside cabinets where food is stored. Discard infested food packages. Do not spray across top of stove or near pilot lights.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store in a cool dry area away from heat or open flame.
DISPOSAL: Replace cap and discard containers in trash. Do not incinerate or puncture.
