AND POLLUTION PREVENTION

Safeguard Chemical Corporation.
c/o Ms. Kim Davis
RegWest Company, LLC
8203 West 20th Street, Suite A
Greeley, CO 80634-4696

APR 21 2011

Dear Ms. Davis:

Subject: Amendment: Update per me-too label and PR Notice 2007-4
Black Jack DS205 Insect Killer
EPA Reg. No. 8848-72
Your submission dated January 21, 2011

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) section 3(c)(7)(a), is acceptable and a stamped copy of the label is enclosed for your records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions regarding this letter, please contact Dana Pilitt, PhD of my staff at (703) 305-7071 or via e-mail at pilitt.dana@epa.gov.

Sincerely,

A handwritten signature in cursive script, appearing to read "Richard Gebken".

Richard Gebken

Black Jack® DS 205 Insect Killer

[[Select marketing claims from "Marketing Claims" section]]

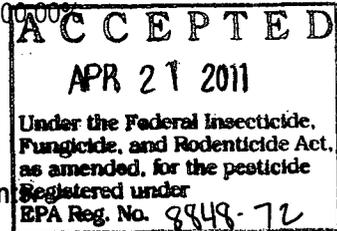

Active Ingredients:

S-Bioallethrin (CAS No. 28434-00-6)..... 0.05%
Deltamethrin (CAS No. 52918-63-5) 0.02%

Other Ingredients* 99.93%

Total..... 100.00%

*Contains petroleum distillate.

**Keep Out of Reach of Children
CAUTION**

See side panel for First Aid and additional Precautionary Statements

EPA REG. NO. 8848-72

EPA Est. _____

Net Wt: _____ oz (_____ g)
{8 ounces through 1 pound}

{Side Panel}

First Aid

If Swallowed:	<ul style="list-style-type: none"> • Immediately call a poison control center or doctor. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give any liquid to the person. • Do not give anything by mouth to an unconscious person.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. [In case of medical emergencies or health and safety inquiries or in case of fire, leaking or damaged containers, information may be obtained by calling {24/7 toll free number}.]	
Note to Physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.	

{Note: The First Aid statements' grid format will be used if market space permits; otherwise a paragraph format will be used.}

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

{Products labeled for exclusively indoor applications may omit the 'Environmental Hazards' section}

Environmental Hazards

This product is toxic to fish. Do not apply directly to water. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

Physical or Chemical Hazards

Contents under pressure. Keep away from heat, sparks and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not apply this product in or on electrical equipment due to the possibility of shock hazard.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Black Jack DS 205 Insect Killer works in two ways: 1) it kills bugs fast on contact and 2) its residual action keeps on killing German Cockroaches and Houseflies for up to 12 weeks [3 months] after you spray. Contact kill gives immediate results when directly spraying insects.

Shake Well Before Each Use. Hold container upright. Do not spray up into air. Apply only to surfaces. Remove protective cap and direct spray away from face. Hold can 12-15 inches from surface being sprayed. Press button down and spray as directed. Test product in an inconspicuous area before large scale application. Spray surface until slightly wet, but not to the point of run-off; over-application may cause damage. Black Jack DS 205 Insect Killer will not stain surfaces or fabrics where water alone causes no damage.

Remove pets, birds and cover fish aquariums before spraying. Prevent re-entry of dogs and cats into treated area until spray deposits are dry.

Black Jack DS 205 Insect Killer insecticide is intended for use in and around residential structures and their immediate surroundings. Permitted areas of use include: apartments, atriums, attics, automobiles, basements, bathrooms, boats, cabins, campers, carports, cat sleeping quarters, clothes storage, condominiums, decks, dens, driveways, garages, gazebos, homes, kitchens, lanais, living rooms, parlors, patios, pet sleeping areas, play rooms, porches, recreational vehicles, rooms, solariums, storage areas, sun rooms, utility rooms and verandas.

Application is prohibited directly into sewers, drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

Indoors

Ants: Spray around ant trails, doors and windows and other places where ants enter the premises. Repeat as necessary, but not more than once per week.

Ants, Booklice, Boxelder bugs, Centipedes, Cockroaches (including adult and immature stages of both non-resistant and organophosphate- and carbamate-resistant strains), **Crickets, Dermestids, Firebrats, Fleas, Palmetto bugs, Silverfish, Sowbugs, Ticks and Waterbugs:** Apply as a spot and crack & crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and similar areas. When pests are driven out, spray directly. Cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Cover or remove exposed food. Repeat as necessary but not more than once per week.

Carpenter Ants: For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Spray into infested wood through existing openings.

Carpet Beetles (Black, Furniture and Varied): Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insect are found.

Centipedes, Ground Beetles, Pillbugs, Sowbugs, Scorpions and Ticks: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

[Cockroaches: Spray in cracks and crevices, around baseboards and other hiding places until wet. When driven out, directly spray bugs.]

[Crickets, Earwigs, Silverfish and Spiders: Apply around doors and windows, baseboards, storage areas, pipes and other areas infested by these pests or directly spray pests. Spray surfaces until wet.]

Fleas and Ticks on Surfaces: Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters. **Adult Fleas and Larvae** contacted by spray will be killed. Put fresh bedding down once spray has dried. Do not spray animals. For best results, treat pets with a flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets where infestations are bad. Test delicate fabrics for staining in an inconspicuous area prior to large scale use.

Pantry Pests: Chocolate Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Drugstore Beetles, Elmleaf Beetles, Flour Beetles (Red and Confused), Grain Beetles (Rusty, Merchant and Saw-toothed), Lesser Grain Borers, Rice Weevils, Spider Beetles and Tobacco Moths: Treat exposed stages. Remove all food-stuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of shelf paper, food and utensils. Wash any exposed food handling surfaces and utensils before use.

Spiders: Apply along and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

Webbing Clothes Moths: Use this product as a crack and crevice treatment in closets and other storage areas where these pests are found. This is an adjunct treatment and will not control moth larvae already on clothes. Do not apply to clothing.

Outdoors

Remove all exposed food and cooking utensils. Cover all food handling surfaces and/or wash thoroughly after treatment and before use. Do not use on edible crops.

Do not contaminate fish ponds or apply directly to water. Do not water the treated area to the point of run-off. Do not make applications during rain. All outdoor applications must be limited to only spot or crack-and-crevice treatments, except for the following permitted uses:

1. Treatment to soil or vegetation around structures;
2. Applications to lawns, turf and other vegetation;
3. Applications to building foundations, up to a maximum height of 3 feet.

Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to only spot and crack & crevice applications.

Point nozzle away from face. Hold can on slight downward angle, approximately 12-15 inches from surface to be sprayed. For best results, spray when air is calm. Spray with wind if breeze is blowing.

Ants: Spray around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris until surface is wet. Repeat as necessary, but not more than once per week. **[Ants:** Spray ant trails and hills. If nest can be located, spray surface of nest until wet.]

Crawling Insects: Ants, Cockroaches (including Asian cockroaches), Centipedes, Crickets, Mole Crickets, Waterbugs and Silverfish. Hold can 12-18 inches from surface to be treated and spray infested surface of patio or

picnic area, hitting as many insects as possible. Spray to slightly moisten the surface. Also spray legs of tables and chairs to repel ants. Spray ant hills for best control.

Bees, Hornets and Wasps: Spray nests and bees directly. Aim spray at nest openings. Apply in late evening when insects are at rest.

Crickets, Dog ticks, Fleas, Earwigs and Lone Star ticks: Apply thoroughly to infestation in bushes, grass or weeds.

Fire Ants: To quiet active ants on the surface, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear

Flying Insects: Houseflies, Gnats, Mosquitoes and Small Flying Moths: Use only on outdoor surfaces. Spray outside surfaces of window and door frames and other areas where these pests may enter the home. Also spray localized resting areas, such as under eaves, porches, surfaces around light fixtures and cords, railings, etc. where these insects may rest. Insects coming to rest on treated surfaces will be killed.

Pests on Outside Surfaces of Buildings: For control of building infestations of **Ants, Clover, Mites, Crickets and Sowbugs (Pillbugs):** Spray foundation of building where insects are active and may find entrance up to a height of 2-3 feet. Apply as a residual spray to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps. Repeat treatment as necessary, but not more than once per week.

For the control of Garden Insects: To kill Aphids, Armyworms, Clover Mites, Exposed Thrips, Japanese Beetles, Lace Bugs, Leafminers, Pavement Ants, Red Mites, Spider Mites and Whiteflies: Using a sweeping motion from a distance of at least 18 inches, directly spray insects whenever possible on African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, crassula, dahlias, delphiniums, dogwood, English ivy, euonymus, fuchsia, geraniums, grape vine, Kentia palm, laurel, marigolds, rhododendrons, roses, rubber plants, snapdragons, stocks, wandering Jews, zinnias and other ornamentals. Spray in 1 second bursts and be cautious about wetting tender foliage, young plants and new growth. Over-application may cause damage. Do not spray plants when temperature exceeds 90°F (32°C). Reapply if reinfestation occurs, but not more than once every week. Spray may be used on plants, as well as a multi-purpose spray in small gardens, and for spot treatments of incipient insect infestations to prevent spreading to large garden areas.

<p>Storage and Disposal</p> <p>Do not contaminate water, food or feed by storage or disposal.</p> <p>Pesticide Storage: Store in a cool, dry (preferably locked) area inaccessible to children and pets and away from heat, sparks and open flame. Container Disposal: Non-refillable container; do not reuse or refill this container. Do Not Incinerate or Puncture! If empty: Offer for recycling, if available; otherwise discard in trash. [This container may be recycled in aerosol recycling centers. At present, there are only a few such centers in the country. Before offering for recycling, empty the can by using the product according to the label.] If partly filled: Call your local solid waste agency for disposal instructions.</p>

{Per PR Notice 2007-4 the batch code/lot number will appear on the label or container.}

[Notice:] To the extent permitted by applicable law, buyer assumes all responsibility for safety, storage, handling and use of this material not in strict accordance with directions given herewith.

[Important: Read Before Use

Read the entire Directions for Use and Notice before using this product. If terms are not acceptable, return the unopened product container at once.]

{Enlargement:
No CFCs.

Contains no CFCs which deplete the ozone layer.
Federal regulations prohibit CFC propellants in aerosols.}

{Marketing Claims}

For Household and Domestic Use
Contains Deltamethrin and S-bioallethrin
Water-Based

Killing Action and Residual Control
Fast Knockdown Formula
Long-Lasting Control

For Indoor/Outdoor Use
Kills Fleas-Roaches-Ants-Spiders

Kills on Contact
Kills Hidden Bugs

Kills Bugs You See and Even the Ones You don't See
Broad Spectrum Insect Control

Highly Effective Against Ants, Bees, Carpenter Ants, Carpet Beetles, Centipedes, Cockroaches, Crickets, Firebrats, Fleas, Flour Beetles, Grain Beetles, Ground Beetles, Mole Crickets, Moths, Pillbugs, Scorpions, Silverfish, Sowbugs, Spiders, Ticks and Many Other Crawling Insects In and Around Homes, Recreational Vehicles, Cabins, Tents and other Recreational Structures

Not for use on plants grown for sale or other commercial use.

No Oily Residue – No Unpleasant Odor
No Greasy Residue – Non-Staining
Won't Stain Carpets and Floors
Protects for up to 4 weeks
Keeps on Killing

Use Black Jack DS 205 Insect Repellent and you will have "Delta Blow" to your home invading bugs.
