## BLACK JACK BORIC ACID ROACH KILLER

BLACK JACK BORIC ACID is a white, non-staining, odorless, electrostatically charged powder that clings to the legs of insects as they carry it back to their hiding places. This powerful product will destroy roaches and insects by ingestion. It also gives protection against ants, silverfish and waterbugs.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Shake well. Remove cap to expose tip. Then snip off a portion of the tip as shown in picture No. 1, so that powder will flow freely. BLACK JACK BORIC ACID can be applied quicker by removing the cap as shown in picture No. 2, so that the powder will flow liberally. A spoon can also be used to spread the powder.

To control cockroaches, ants and silverfish, apply liberally, scattering under and behind refrigerator, stove sink, dishwasher, washing machine and dryer, tubs; into openings around drains, water pipes and electrical conduits; and in cracks and crevices along baseboards and corners of cabinets, cupboards, and closets. Remove all lower drawers in kitchen and bathroom cabinets, bedroom drawers and chests of drawers, then scatter liberally in drawer walls.

This product may be used in homes, restaurants, markets, schools, warehouses, factories, offices, hotels, motels, hospitals, nursing homes, garages, grocery stores, apartment buildings, new construction, industrial plants, theaters, ships, boats, trains, trucks, yachts, camps, mobile homes, buses, zoos, kennels, military bases, libraries, utilities and sewers.

Reapply as necessary. Any powder visible after application must be brushed into cracks and crevices or removed. Apply only in areas inaccessible to children and pets. Do not use in edible product areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Avoid contamination of feed and foodstuffs.
