

AQUALAND
NEW FIRE RESISTANT
CHLORINE CONCENTRATE

DISSOLVES IMMEDIATELY • NO MINERAL SCALE
 EASY CONTROL OF PH LEVELS

DIRECTIONS: Add 2 ounces (1/2 cup) of AQUALAND Chlorine Concentrate to 100 gallons of water. In swimming pools, it has been found that 1/2 cup of AQUALAND Chlorine Concentrate per 100 gallons of water will keep the water clear for four weeks, and this quantity is adequate to keep the water clear for four months. For a more detailed study of the use of AQUALAND Chlorine Concentrate, see the literature available from the manufacturer.

NOTE: In newly treated pools, it is recommended that the daily dose be adjusted to satisfy the chlorine demand of the water, and establish a chlorine residual of 1.0 to 1.5 ppm. Add AQUALAND CHLORINE CONCENTRATE to the pool water. Maintain a pH of 7.4 to 7.6 and a calcium reading from 100 to 150 ppm. A test kit should be used frequently to check chlorine content. Readings may be taken any time of day for chlorine. Dosage may be varied to correct for changing bathing conditions and weather. Rinse empty container thoroughly with water and discard it. Do not use pool if chlorine residual is in excess of 2.0 ppm.

"KEEP OUT OF THE REACH OF CHILDREN"

DANGER: Oxidizing material. Contact with any organic material may cause fire. Will burn with evolution of chlorine gas. May cause blindness. May be fatal if swallowed. Causes eye damage and will cause burns on wet skin. Do not contact eyes or clothing. Do not breathe dust. Store in a cool, dry place.

This product is highly toxic. Keep out of lakes, streams, or ponds. Do not use in residential areas. Do not use in areas where it will come into contact with drinking water.

FIRST AID: Keep away from heat. Avoid fire. In case of contact with skin, wash with water. In case of contact with eyes, flush with water and seek medical attention.

ACTIVE INGREDIENT: Sodium Dichloro-s-triazinetriene Dihydrate 100%
AVAILABLE CHLORINE: 56%
 NET WEIGHT 10 POUNDS

BEST DOCUMENT AVAILABLE

SUPER SHOCK

DIRECTIONS FOR USE
Swimming Pool Disinfectant: Begin with fresh water. Use 6 1/2 oz. ARCO SUPER SHOCK for each 10,000 gallons of water to get a 0.6 ppm. This dosage should be repeated until a chlorine residual of 0.6 to 1.0 ppm is obtained as measured by a test kit.

Mix required amount of ARCO SUPER SHOCK with about one part of water and feed solution through a chlorinator, or dilute and scatter over surface of pool. If warm weather prevails or pool has unusually heavy use, maintenance dosage may have to be repeated more frequently.

Adjust PH in the measurement of the acid or alkaline content of the pool water.

SUPER LIQUID FOR SWIMMING AND WATER

ACTIVE INGREDIENTS
Sodium hypochlorite . . .
INERT INGREDIENTS . . .

Weight of gallon 9.8 lb. Equivalent

CAUTION: IRRITANT
KEEP FROM CHILDREN
IRRITATING TO EYES AND SKIN
AND OTHER REQUIRED STATEMENTS

NET CONTENTS: 1 U.S. GALLON
EPA Reg. No. 100-100-01
