

# ALGAECIDE

## DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ALGAECIDE is used to control the growth of algae in exterior spas and hot tubs. For maximum effectiveness, spas and hot tubs containing heavy growth of algae should be cleaned prior to using ALGAECIDE.

For spas and hot tubs having just an algae growth add a dose of 2 fluid ounces of ALGAECIDE per 500 gallons.

For treatment of a fresh cleaned and filled spa or hot tub add initially 1 fluid ounce of ALGAECIDE per 500 gallons.

To maintain spas and hot tubs free of visible algae growth, subsequent additions of 1 fluid ounce of ALGAECIDE should be made every 7 to 10 days after the initial treatment.

ALGAECIDE is compatible with those chemicals normally used to treat spas and hot tubs and effective on both acid and alkaline pH. ALGAECIDE can be used in spas and hot tubs treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALGAECIDE with concentrated disinfecting chlorine products.

**STORAGE & DISPOSAL:** Keep container closed when not in use. Do not contaminate water, food, or feed by storage or disposal. Washing of equipment. Do not reuse empty container. Triple rinse container and dispose of contents in a manner that is approved and permitted by local, state, and federal authorities. Do not reuse this container. Private that this is not a household product. Should be kept out of reach of children. Do not use in areas where it may be harmful to plants, animals, or fish.
