CHLORINE CONCENTRATED TABLETS

CONDITIONING AND PREPARING YOUR POOL

- A. Add ARCO Conditioner (Cyanuric Acid) slowly through the skimmer at the rate of 1 lb per 4,000 gallons pool water. This is done only once at the beginning of the pool season. By doing so it reduces the effect of sunlight on chlorine concentrate and enables you to maintain a chlorine residual longer.
- B. To prevent the growth of algae, chlorinate at the start of the season with 8 oz of ARCO Chlorine Concentrated Tablets, per 20,000 gallons of pool water. Add slowly dissolving ARCO Concentrated Tablets to the skimmer. Chlorinate when there are no swimmers in the pool. Resume swimming when the Chlorine residual has dropped to 1.0 PPM.
- C. Adjust the pH to 7.4 to 7.6. If it is above 7.6 add pH Minus (Dry Acid). If it is below 7.4, add pH Plus (Dry Soda). A pH Test Kit should be used for proper pH adjustment.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS

ARCO Chlorine Concentrated Tablets are formulated to release chlorine throughout the day. It is recommended that they be placed in the skimmer. Recommended dosage: 2 oz per 10,000 gallons of Pool Water every day or as needed to maintain a chlorine residual of 1.0 to 1.5 PPM as determined by a test kit.

KEEP OUT OF REACH OF C

Highly corrosive. Causes skin and eye damage. May be fatal if on skin or on clothing. Wear goggles or face shield and rubber gloves and throat. Avoid breathing dust. Remove and wash contaminated clothing. STATEMENT OF PRACTICAL

If swallowed: Drink large quantity of water. Do not induce vomiting. If on skin: brush off excess chemical and flush skin with cold water. If in eyes: Flush with cold water.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into public waterways unless in accordance with NPDES permit.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Do not add this product to any dispensing device containing other chemicals. Use may cause a violent reaction leading to fire or explosion. Contact with other chemicals may start a chemical reaction with hazardous gases and possible generation of fire explosion. In case of fire, use water to cool container. If possible isolate container in open air or in volume of water if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container in a cool, dry, well-ventilated area away from heat or open flame. If possible, and flood with large amounts of water to dilute. Wastes resulting from the use of this product may be disposed of in a hazardous waste disposal facility. Do not reuse empty container. Rinse empty container and all material before discarding. Wrap container in newspaper or

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT
If swallowed: Drink large quantity of water. Do not induce vomiting. Call a physician immediately. If on skin: brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waterways unless in accordance with NPDES permit. For guidance contact your regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Mix only with water. Use clean utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reuse container. If possible isolate container in open air or well-ventilated area. Flood with large volume of water if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of a decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Waste resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Wrap container in newspaper and discard in trash.
