CHLORINATING CONCENTRATED TABLETS

CONDITIONING AND PREPARING YOUR POOL

A. Add ARCO Conditioner (Cyanuric Acid) slowly through the skimmer 1 lb per 4,000 gallons pool water. This is done only once at the beginning of the pool season. By doing so it reduced the effect of sunlight on the chlorine concentrate and enables you to maintain a chlorine residual longer.

B. To prevent the growth of algae, chlorinate at the start of the season with 8 oz. of ARCO Chlorinating Concentrated Tablets, per 20,000 gallons of pool water. Add slowly dissolving ARCO Chlorinating Concentrated Tablets to the skimmer. Chlorinate when there are no swimmers in the pool. Resume swimming when the Chlorine residual has dropped to 1.0 PPM.

C. Adjust the pH to 7.4 to 7.6. If it is above 7.6 add pH Minus (Dry Acid). If it is below 7.4, add pH Plus (Dry Soda). A pH Test Kit should be used for proper pH adjustment.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS

ARCO Chlorinating Concentrated Tablets are formulated to release chlorine throughout the day. It is recommended that they be placed in the skimmer. Recommended dosage 2 oz per 10,000 gallons of Pool Water every day or as needed to maintain a chlorine residual of 1.0 to 1.5 PPM as determined by a test kit.

CHLORINATING CONCENTRATED TABLETS

DANGER
PRECAUTIONARY STATEMENT
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed or absorbed through clothing. Wear goggles or face shield and rubber gloves and avoid breathing dust. Remove and wash contaminated clothing.

STATEMENT OF PRACTICAL TREATMENT

If swallowed: Drink large quantity of water. Do not induce vomiting if on skin: brush off excess chemical and flush skin with cold water to prevent gas medical attention. If in eyes: Flush with cold water for a minimum of 15 minutes.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into public waterways unless in accordance with NPDES permit. For office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. May react with organic materials. Do not add this product to any dispensing device containing other chemicals as they may cause a violent reaction leading to fire or explosion. Contact with other chemicals may start a chemical reaction with generation of toxic gases and possible generation of fire explosion. In case of fire: Do not remove container. If possible isolate container in open air or well-ventilated area if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed and a cool, dry, well-ventilated area away from heat or open flame. In a container, if possible, and flood with large amounts of water to dilute. Wastes resulting from the use of this product may be disposed of a licensed facility. Do not reuse empty container. Recycle empty container of material before recycling. Wash container in newspaper and dry.
