ALGAE-OUT "400"

DIRECTIONS FOR USE

ALGAE-OUT 400 is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using ALGAE-OUT 400.

FOR POOLS HAVING JUST VISIBLE algae growth, add an initial dose of 11 to 17 fl. oz. of ALGAE-OUT 400 per 10,000 gal. of water and remove settled algae debris by cleaning.

FOR TREATMENT OF FRESHLY CLEANED AND FILLED POOLS, add initially 6 to 11 fl. oz. of ALGAE-OUT 400 per 10,000 gal. of water.

TO MAINTAIN POOLS free of visible algae growth, subsequent additions of 2 to 4 fl. oz. of ALGAE-OUT 400 per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment. Uniform distribution of ALGAE-OUT 400 throughout the water in the pool is necessary for maximum effectiveness.

ALGAE-OUT 400 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH.

ALGAE-OUT 400 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALGAE-OUT 400 with concentrated dry or liquid chlorine products.
