Make the following labeling product for shipment:	changes before yo	ou release the
1. Revise the Environmenta	l Hazard Statement	as follows:
"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA."		
ATTACHMENT IS APPLICABLE		
SIGNATURE OF APPROVING OFFICIAL		DATE
EPA Form \$570-6 (Rev. 5-76) PREVIOUS EDITI	ON MAY BE USED UNTIL SUPPLY	

2. Revise the oral ingestion statement as follows:

"IF SWALLOWED, drink large amounts of water. DO NOT induce vomiting. Call a physician or poison control center immediately."

3. Move the statement of practical treatment to its required position on the front panel.

4. Reposition the signal word, "Danger", as follows:

## DANGER

Keep Out Of Reach Of Children

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

## SWIMMING POOL WATER DISINFECTION

For a new pool or spring start-up. superchioringle with 10 to 20 oz of product for each 10,000 gallons of water to yield 5 to 10 ppm cvallable chlorine by weight Check the level of available chiorme with a rest kit. Adjust and maintain pool water pH to between 7.2 to 7.6 Adjust and maintain the alkalinity of the pool to between 50 to 100 ppm.

To maintain the pool, add manually or by a leader device 2 oz. of this product for each 10.000 gallons of water to yield an available chiorine residual between 0.5 to 1.0 ppm by weight. Stabilized pools should maintain a residual of 1.0 to 1.5 pom available chorine. Test the pH, available chiorine residual and alkalimity of the water frequently with appropriate test kits. Frequency of water treatment will depend upon temperature and number ol swimmers.

Every 7 days, or as necessary, superchlorinale the pool with 10 to 20 oz. of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a rest kit. Do not re-enter pool until the chiorine residual is between 1.0 to 3.0 ppm

At the and of the swimming pool season or when water is to be drained from the pool, chloring must be allowed to dissipate from treated pool water before discharg- Do not chloringle the pool within 24 h- urs prior to discharge

WINTERIZING POOLS -- While water is still clear & clean, apply 0.6 oz, of product per 1000 gallons, while filter is running, to obtain a 3 ppm available chiprine residual as determined by a suitable test kit. Cover pool, prepare heater, filter and heater components for writter following manufacturers' instructions
