30,000 USP units per lb. **FEEDING DIRECTIONS** 

Feed free choice. Intake will be 5 to 6 ounces per head daily depending on bodyweight of animal. Do not offer any other mineral or salt mixtures. The above daily intake will furnish the proper levels of medication. WARNING: Do not feed this medicated block to lactating dairy animals.

Occasional sensitivity to phenothiazine has been reported in cattle.

## CAUTION KEEP OUT OF REACH OF CHILDREN

Note: For maximum protection against horn flies and face flies, it is recommended that cattle be sprayed once when first starting on a continuous JIM DANDY BAR-FLY Program. JIM DANDY BAR-FLY prevents the breeding of horn flies and face flies in the manure but does not affect any existing adult fly program. Be sure and supply ample blocks at all times — at least one block for every 10 to 12 head.
