KOCIDE 220 AGRICULTURAL FUNGICIDE

GENERAL INSTRUCTIONS

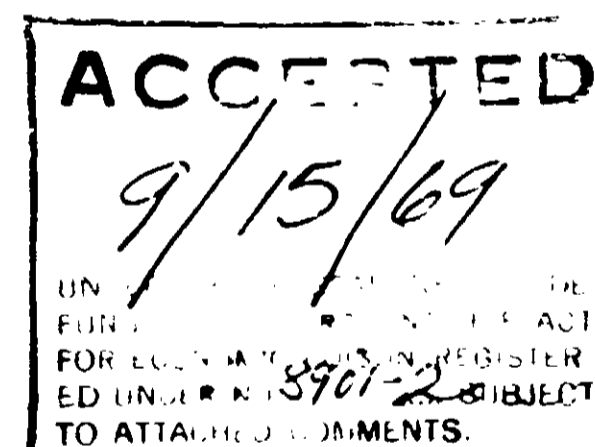

Use KOCIDE 220 as noted below. KOCIDE 220 is for aircraft or mist sprayers capable of spraying low volumes (1-3 gal/acre). KOCIDE 220 is not intended to be mixed with water, but used as supplied.

In case of skin contact, remove with washing; for eyes, wash with copious amounts of water and get immediate medical attention.

The following specific instructions are based on general applications. However, the recommendation of local Agricultural Experiment Stations should be closely followed as to timing, frequency and number of sprays per season.

SPECIFIC INSTRUCTIONS

CROP	TO CONTROL	RECOMMENDATIONS
Sugar Beets (Texas- New Mexico)	Cercospora leaf- spot	Start spray when disease threatens and continue for four to five applications. Spray 10 to 14 days depend- ing on weather conditions and disease severity at one gallon per acre.

CAUTION

Avoid contact with skin and eyes. In case of skin contact, remove with washing; for eyes, wash with copious amounts of water and get immediate medical attention.

Keep out of any body of water; fish may be killed.
