GENERAL INSTRUCTIONS

Use K-Cop as directed below. Depending on the equipment used and the specific crop, the volume applied per acre will differ. For high volume sprayers, use 5 to 20 gallons per acre (GPA); for ground and concentrate ground sprays, apply from 20 to 100 GPA. For aerial sprays, 3 to 10 GPA are commonly used.

Observe all precautions and limitations on label of all products used as mixtures. Since the number of conditions of pesticide mixtures is very large, it is advisable to test mixtures first and to apply mixtures as soon as possible.

The following specific instructions are based on general applications. The recommendations of local Agricultural Experiment Stations should be closely followed as to timing, frequency and number of sprays per season.

SPECIFIC INSTRUCTIONS

BEANS. Bacterial Blight (Leon & Common). Use 0.33 to 0.75 gallon per acre. Make first application when plants are 3 to 6 inches high. Select a problem area, and when plants begin to vine, continue applications on a weekly basis. When plants are 6-9 inches high, continue applications on a 3-7 day schedule, depending on local conditions.

CANTALOUPE, MELONS. Apply 0.33 to 0.75 gallon per acre when plants are 3 to 6 inches high. Prevent disease symptoms in areas where bacterial blight is a problem. Applications should be made on a 3-7 day schedule.

CELERY. Leaf & Bacterial Blight. Apply 0.33 to 0.75 gallon per acre. Begin applications when plants are first established, then every 7 days, depending on disease conditions.

CUCUMBERS. Apply 0.33 to 0.75 gallon per acre when plants begin to vine. Continue applications on a weekly basis. When disease symptoms appear, applications should be made on a 3-7 day schedule.

PEANUTS. Continue 0.15 to 0.33 gallon per acre at 10-14 day intervals between applications when disease symptoms appear.

PEPPERS. Bacterial Blight. Apply 0.33 to 0.75 gallon per acre. Begin applications when disease symptoms appear and continue at 10-14 day intervals.

CAUTION—Avoid contact with skin and eyes. In case of skin contact, wash with soap and water. In case of eye contact, flush with water for 15 minutes. Call a physician immediately if symptoms persist.

NOTICE: K-CO Chemical Corporation warrants that this product in its unwrapped package conforms to the chemical description on the label and is reasonably fit for the purposes set forth on the label when used according to directions under normal use conditions on the plants and crops described. This warranty does not extend to the handling or use of this product contrary to label instructions or under abnormal conditions of use. See label for more information.
