

KOCIDE SD AGRICULTURAL FUNGICIDE

GENERAL INSTRUCTIONS

KOCIDE SD should be used as described below. KOCIDE SD is specially formulated for use as a seed protectant. It is compatible with many fungicides and other materials commonly used as seed disinfectants. Because of the wide number of combinations possible with other pesticides, it is recommended that specific mixtures be evaluated before use with this product.

The following specific instructions are based on general applications. The recommendations of local Agricultural Experiment Stations should be closely followed.

SPECIFIC INSTRUCTIONS

Use KOCIDE SD at the rate of 4 ounces (120 milliliters) for each 100 pounds of rice seed. For ease of handling and when using a seed treating machine, dilute KOCIDE SD with an equal volume of water. Maintain continuous agitation of the mixture throughout the operation. (Phytotoxicity may occur in drill-seeded rice. Consult local agricultural experiment station regarding specific recommendations for your area.)

CAUTION— Avoid contact with skin and eyes. In case of skin contact, remove with washing; for eyes, wash with copious amounts of water and get immediate medical attention. Treated rice seed should not be used for food, feed or oil purposes.

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or by disposal of wastes. Apply this product only as specified on this label. Do not reuse container. Destroy when empty.

NOTICE: KOCIDE CHEMICAL CORPORATION warrants that this product in its unopened package conforms to the chemical description on the label and is reasonably fit for the purposes set forth on the label when used according to directions under normal use conditions on the plants and crops specified. THERE ARE NO OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. This warranty does not extend to the handling or use of this product contrary to label instructions or under abnormal conditions or under conditions not reasonably foreseeable to seller and buyer assumes all risk of any such use.

FOR ALL WOOD SURFACES WOOD-STAIN PRESERVER

Wood must be - BARE, CLEAN AND DRY
Stir Thoroughly Before Using.

Lumber in contact with the soil should be dipped for three minutes minimum. For maximum protection, poles, fence posts and foundation timbers should be immersed in WOOD-STAIN PRESERVER for a maximum of 12 to 48 hours.

O.K. under varnish, shellac, paint and Waterlox products.

Apply one or two flowing coats of WOOD-STAIN PRESERVER by brush or spray to attain the depth of color desired.

If a gloss finish is desired, wait a minimum of two days before applying a finish coat. See your Waterlox dealer for specific instructions.

Clean-up mineral spirits and paint thinner
Average coverage 150 sq. ft.
