

Corexit Chemicals

7671 Oil Field Bactericide

Active Ingredients	
Sodium 2,4,5-Trichlorophenate	44.92%
Methyl Alcohol	20.00%
Inert Ingredients	
	35.08%
	100.00%

DANGER! POISON! Keep Out of Reach of Children.

See first aid statement and other precautions on right panel.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT

EPA Registration No. 8928-5

EPA Est. 8928 TX-1

Houston, Texas 77001

MADE IN U.S.A.

DANGER! POISON!

May be fatal or harmful if inhaled or swallowed. Produces severe chemical burns. Causes severe eye and skin damage. Methanol may cause blindness if swallowed. Do not breathe vapor. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves and protective clothing when handling. Wash thoroughly after handling.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician. Wash clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician immediately. In case of inhalation exposure remove patient to fresh air, keep him warm and quiet, and call a physician immediately.

NOTE TO PHYSICIAN

Measures against circulatory shock, respiratory depression and convulsion may be needed. Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF FIRE

Use foam, dry chemical, carbon dioxide or water. DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAMES.

IN CASE OF SPILL OR LEAK

Recover free liquid. Soak up residue with solid absorbent. DO NOT FLUSH INTO SURFACE STREAMS.

This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

GENERAL INFORMATION

COREXIT 7671 is a heavy-duty bactericide developed for controlling bacterial problems in packer fluids and completion fluids, for preserving drilling muds, and for periodically removing microbial deposits from water flood units and other oil field production systems. A highly concentrated, low pour point liquid solution of sodium trichlorophenate, it is soluble in fresh water and in saturated brines. It is particularly effective in killing sulfate reducing and slime forming bacteria, and is highly recommended for the control of bacterial activity in casing packer fluids and drilling muds. For packer fluids and muds, use 5-10 gallons **COREXIT 7671** per 100 barrels of fluid. Water treatment levels vary from 10-100 ppm depending on the severity of the problem and the method of treatment. For more detailed directions see **COREXIT Bactericide Bulletin** and appropriate Product Data Sheet.
