

Corexit Chemicals

7670 Oil Field Bactericide

Active Ingredients

n-Alkyl-1,3-Propylene Diamine	13.13%
Glycolic Acid	11.37%
2, 4, 5 Trichlorophenol	18.00%
Isopropyl Alcohol	27.00%
Inert Ingredients	30.50%
*As in fatty acids of coconut oil	
	100.0%

*As in fatty acids of coconut oil

DANGER! Keep Out of Reach of Children

See back panel or label for other precautions in chapter 1.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT.

EPA Est. 9561 TX 1

MADE IN U.S.A.

DANGER! CORROSIVE!

May be fatal or harmful if inhaled or swallowed. Produces severe chemical burns. Causes severe eye and skin damage. Do not breathe vapor. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves and protective clothing when handling. Wash thoroughly after handling.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician. Wash clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Call a physician immediately. In case of inhalation exposure remove patient to fresh air, keep him warm and quiet, and call a physician immediately.

NOTE TO PHYSICIAN:

Measures against circulatory shock, respiratory depression and convulsion may be needed. Probable mucosal damage may contraindicate the use of air resuscitation.

IN CASE OF FIRE

Use foam, dry chemical, carbon dioxide - water. DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

IN CASE OF SPILL OR LEAK

Recover free liquid. Soak up residue with solid absorbent. DO NOT FLUSH INTO SURFACE STREAMS.

This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

GENERAL INFORMATION

COREXIT 7670 is a combination bactericide and corrosion inhibitor for use in treating water injection wells and associated surface piping and tubing, packer fluids and drilling muds. It is not recommended for use in surface ponds which empty into rivers or lakes. It is particularly effective as an sulfate reducing and slime-forming bactericide. It is an excellent inhibitor against corrosion caused by hydrogen sulfide, carbon dioxide, acids and salts due to its ability to form tenacious films on metal surfaces. Treatment levels vary from 10-100 ppm depending on the severity of the problem and the method of treatment. For more detailed information see **COREXIT Bactericide Bulletin** or contact your Product Data Sheet.
